Name: Harpy  
Sex: Female, Sterilised  
Breed: Singapore Special  
Age: 5

Harpy

HDB APPROVED (UNDER PROJECT ADORE)

I am...

A quick learner but can be somewhat shy so please give me some time to warm up to you! I have been praised for being smart as I pick up new skills very quickly. I am willing to learn, if you would just teach and guide me! I love going for walks and exploring but I don't particularly enjoy cuddles and being with other pets. Fret not, if you give me enough time and love, I will learn to adapt. I also have a very keen sense of smell so remember to hide your treats well!

I'm most suited to...

A patient family without any other pets. While I take to humans well, I can be wary of other animals. The good news is that I can still go on walks without being distracted by other dogs if they are a distance away, but please help me avoid them if possible!

I am...

A gentle and sweet boy that will warm your heart once you get to know me! I enjoy going on long quiet walks and exploring the outdoors at my own pace! When I first arrived at the Centre, I was wary and cautious of many things. However, with the help of my paw friends here, I started to feel more confident and secure. Although I still struggle being around unfamiliar people, places, and situations; with enough time and encouragement, I know I will be able to gain the confidence I need to overcome my fears! My joys in life include rolling around in grass and socialising with other dogs; although dogs that are too energetic or larger in size can be too overwhelming for me at times.

I'm most suited to...

A patient and understanding family that will help me work through my fears and build up my confidence around unfamiliar people and environments. It would also be great if my future family can continue my cooperative care training so that I can be comfortable when being handled by the vet or the groomer.

## I am...

An intelligent and energetic girl who loves attention and is eager to please. I am always down for an adventure and will happily explore new places with you. I might bark at unfamiliar faces but I warm up quickly and can be quite affectionate if you greet me nicely. My love for food allows me to pick up new tricks rather quickly. I can sit, paw, hi-10 and kiss, just to name a few! On a leash, I tend to pull only because I am excited to meet and play with other paw friends. At the centre, I get along with most dogs and I'm great at bringing the shy ones out of their shells.

## I'm most suited to...

Families who are energetic and love exploring the great outdoors. It would be great if my new family can continue my education in vet handling, meeting strangers and visiting new places.

Sex: Male, Sterilised  
Breed: Singapore Special  
Age: 8

HDB APPROVED (UNDER PROJECT ADORE)

## I am...

A super playful and affectionate dog who will brighten up your day with my lovely smile. While I can be very energetic for my age, I'm happy to spend lots of cuddle time with my favourite people!

I used to be insecure and impulsive around people at the shelter, but now I am much more comfortable and calm. Strangers still scare me though, and I may bark/growl to communicate that I need some space. However, I do warm up quickly to those that greet me politely! I don't like other dogs much but I'm ok if they ignore me.

## I'm most suited to...

An all-adult household with no other pets. It would be great if my future family could continue my education in muzzle training, vet handling and meeting strangers so I can become more confident and comfortable!
