

What is Microchipping?

The process of microchipping involves implanting a permanent identification under your pet's skin. It is a **SAFE** and **QUICK** procedure!

A microchip is:

- 🐾 The size of a rice grain
- 🐾 Contains a unique identification number

Benefits of microchipping:

- 🐾 Form of identification that is traceable to owner once licensed with Animal & Veterinary Service (AVS)
- 🐾 Higher chance of being reunited in the event that your pet is lost or stolen
- 🐾 Allows tracing in case of a disease outbreak

What to do after microchipping your cat?

Complete online pet ownership course (available in four languages)

Microchip your cat

Register your cat on Pet Animal Licensing System (PALS)
