

# Sterilisation of cats

Removal of reproductive organs

Safe procedure with minimal risks

Done under anaesthesia

Cost-effective in the long run

## Benefits:

### Health

- 🐾 Reduces the risk of cancers (mammary, ovarian, uterine, testicular)
- 🐾 Prevents womb infections (pyometra)

### Behaviour

- 🐾 Reduces roaming, spraying, caterwauling and aggression

### Population Control

(Cats can breed from 4 months old)

- 🐾 Prevents unwanted litters
- 🐾 Reduces population growth
