# Trap-Neuter-Rehome/Release-Manage (TNRM) Programme for Community Cats

TNRM programme is a science-based and humane method to manage the community cat population with Animal Welfare Groups (AWGs), veterinarians and the community

1 Trap
- Secure the cats

2 Neuter
- Sterilise to control population
- Microchip for traceability
- Tip left ear to easily identify a sterilised cat

3 Rehome/Release
- Rehabilitate the cats before rehome/release

4 Manage
- Work with AWGs and caregivers to address community feedback
- Conduct education and outreach
