

CHERIE HEARTS @ Charlton

We are very passionate about educating children about the importance of protecting our natural environment. Every year, we participate in the Green Wave campaign and plant specific native trees in our school compound. The native plants that we adopt not only improve the scenic view but also increase the diversity of our garden, Sunshine Garden.

We encourage our little Cherians to continue to love and care not only for the trees but also the biodiversity on the planet.

Each year, our Cherians participate in NParks Biodiversity Week for Schools and learn about various species of plants and animals found in Singapore.
