

Mr. Tan Guan Rui, Jacob

Senior Teacher (Biology), Eco Club Teacher IC

“When I teach, I want my students to go beyond understanding the biology concepts. There is no greater joy than to see my students in awe and wonder of the intricacy of life and nature”

Jacob believes that every student should be actively engaged in solving environmental-related matters

Sparking the Joy of Learning in his students about the natural environment in his school and in nature parks, connecting theory with real-world context by discussing why nature conservation has to be driven by science in land-scarce Singapore

Involved in The Ubin Project Education Workgroup to inspire teachers to make use Pulau Ubin as living classroom for Biology

Involved as a facilitator at an Outdoor Learning Journey conducted on Pulau Ubin for Biology teachers

Spearheading an elective subject in his school that focuses on environmental sustainability

NParks Community in Nature (Schools) Award 2020 - Teacher of the Year
