

PROJECT CYNEFIN

Who we are: A group of Hwa Chong students who really love nature!

Quek Chui Qing, Dawn Lee Yi Xin, Wang Yi En, Tan Teong Seng, Chang Yu Xin

What do we do: Spread the passion for the environment to as many people as possible

Target audience: Our schoolmates

Objectives

- 1) To raise awareness of Singapore's wildlife
- 2) To bring people and nature closer
- 3) To inspire people to contribute to biodiversity conservation in their own ways

Intertidal Walks

Our team conducted intertidal walks at Changi Coastal Walk and Sentosa. This was an introduction to marine wildlife for many, as most have never been exposed to the diversity of animals on our shores before. We concluded the experience with a Coastal clean-up event.

wildLIVE! Exhibition

By showcasing wildlife specimens in the school, we expanded our outreach, spreading awareness about these species and highlighted threats to our biodiversity.

Rail Corridor Events

In a self-conducted nature walk along a stretch of Green Corridor near our school, we shared about biodiversity and heritage. For many of our schoolmates, this was their first time attending a nature walk, and they were surprised by the wildlife right under their noses!

We also set up an activity booth at the Remembering Rail Corridor event, with interactive activities to engage the public.
