

NATURE & CONSERVATION AT PULAU UBIN

Identifying Birds

spot the birds with binoculars

take close up photographs of the birds

identify the birds based on their external features from a bird catalogue

Tagging Trees

loop the metal wire around the tree

slot a tag and a ferrule into the wire

using a clamp, clamp down the ferrule to secure the tag

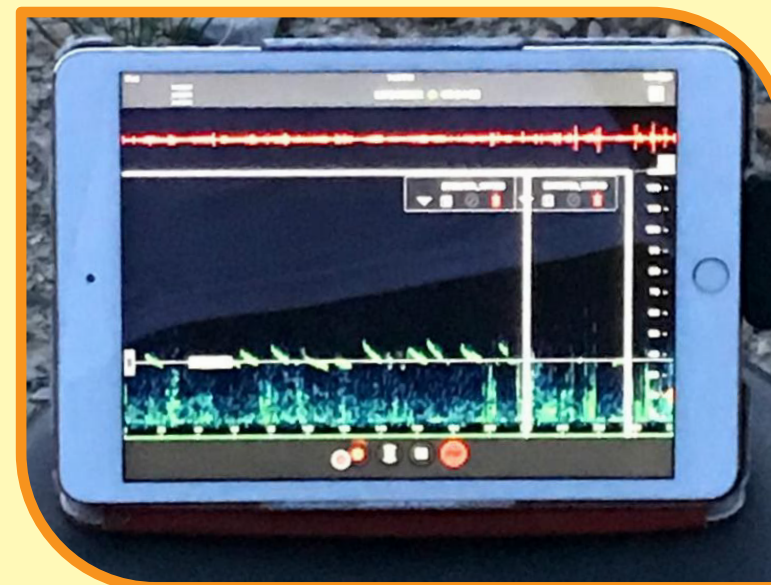

collect data on the tree's girth, height, canopy cover and appearance to determine if the tree is healthy

Identifying Bats

place mist nets

weigh the bat, measure forearms, record gender & tag

after 7pm, when bats are waking up, use bat detectors in open space areas to identify different species of bats by their calls
