

WESTWOOD  
PRIMARY SCHOOL

# Appreciating Biodiversity

## Engaging Pupils and Stakeholders

Westwood Primary School takes pride in providing a thriving habitat for a variety of flora and fauna. Pupils are actively engaged in the learning processes which help with their motivation and creativity through joyful and meaningful learning trails. The message about the importance of protecting the diversity of species is strategically weaved into the curriculum. As part of our outreach efforts, the school also invites stakeholders to benefit from the gardens through green activities. In addition, a Google site with close-up photographs of various fauna serves as a rich resource for everyone. The school will continue to instill the importance of ensuring environmental sustainability in Westwoodians as well as stakeholders. We believe there is something for everyone to discover at the Westwood Gardens!

### Through engaging nature trails

### Programme involving the breeding of butterflies

Visit the following link or scan the QR code for a record of all the sightings of different species of fauna at Westwood Primary School.
