

green matters

Annual Report 2015/16

A scenic view of a park with a river, a path, and a bridge, with pink and yellow flowers in the foreground.

green matters

Access to greenery is integral to Singapore's efforts to improve the quality of life for her residents.

Singapore's green infrastructure has grown with more parks, green spaces and Nature Ways. Ecological resilience has been strengthened through sustained conservation efforts and the establishment of Nature Parks and reserves. Significant efforts have also been made to ensure that all residents can gain access to our parks and gardens.

The greening of Singapore is important in creating a quality living environment, but it is not a task that NParks can undertake alone. It is a constant work in progress that involves people from all walks of life, coming together with a shared vision – and conviction that green matters – to continue shaping Singapore into a City in a Garden.

CHAIRMAN’S MESSAGE

“ We have taken to heart the role of greenery as a social equaliser, moving beyond convenience and proximity of our green spaces to ensure accessibility for all. ”

As a nation, our challenge for Beyond SG50 is to improve liveability for all Singaporeans. At the National Parks Board (NParks), our role in this mission is clear – to develop our City in a Garden in a sustainable and inclusive manner. Be it streetscapes or parks and gardens, our green spaces are a national asset that make Singapore distinct as an urban state.

Our green environment is part of our national infrastructure that improves liveability for all residents. In 2015, NParks extended the Streetscape Greenery Master Plan to another 14 roads and introduced 25 new tree species suitable to our climate and ecosystem. We redoubled our efforts and planted more than 61,000 trees during the past 12 months, more than 2.5 times that of previous years.

Our natural heritage contributes to our ecological resilience required for a sustainable future. In 2015, NParks strengthened the legacy of the Singapore Botanic Gardens, Singapore’s first UNESCO World Heritage Site, by designating a 14-hectare Nature Area within the Buffer Zone. To protect and enhance biodiversity, we also extended the buffer for the Central Catchment Nature Reserve with the opening of Zhenghua Nature Park and Chestnut Nature Park (South). These parks provide vital ecological linkages between nature reserves and forested areas, while managing visitorship pressure on the Reserve. We also opened Kranji Marshes in the third phase of the Sungei Buloh Wetland Reserve Masterplan, ensuring that Sungei Buloh continues to be a living wetland and a tranquil sanctuary for wildlife.

Most importantly, green spaces can act as social equalisers. Honouring Singapore’s chief gardener Mr Lee Kuan Yew’s vision that everyone should have access to a green environment for relaxation and recreation, NParks continued to shape our City in a Garden to ensure that every resident lives within reach of our nation’s green spaces. We have taken to heart the role of greenery

as a social equaliser, moving beyond convenience and proximity of our green spaces to ensure accessibility for all. We opened an inclusive playground at Bishan-Ang Mo Kio Park last year, enabling children with special needs to develop age-appropriate social, communication, motor and cognitive skills while playing with their peers. At HortPark, we designed a therapeutic garden to enhance the well-being of all visitors, including those with conditions such as dementia. In the years ahead, we will also expand on Singapore Botanic Gardens’ Learning Forest and Jacob Ballas Children’s Garden, providing diverse educational opportunities for visitors.

Alongside inclusive access, NParks fosters more than trees and shrubs. We champion inclusive participation and community involvement in shaping our City in a Garden. During our Jubilee year, we crossed the milestone of 1,000 Community in Bloom gardens. This nationwide gardening movement is proof that residents can enjoy and take ownership of their own green spaces. We launched another community engagement initiative, Friends of the Parks, to encourage the community to play an active role in promoting responsible use of the parks, which we share as a national asset central to the quality of our living environment.

Envisioning, building and maintaining a City in a Garden is a constant work in progress, and we hope that you will join us in this effort. Your support is vital for us in realising a green Singapore in which we, and the generations that follow, have a stake in developing a shared future for all.

MRS CHRISTINA ONG
Chairman, National Parks Board

MEMBERS OF THE BOARD

AS OF 1 OCTOBER 2016

MRS CHRISTINA ONG
Chairman

Mrs Christina Ong is founder, owner and managing director of the COMO Group, which comprises luxury fashion retail company Club 21, hospitality company COMO Hotels and Resorts, wellness brand COMO Shambhala, and philanthropic grantmaker COMO Foundation.

In 1995, Mrs Ong was awarded the Cavaliere del Lavoro and received the Italian Fashion Hall of Fame Award for her accomplishments, leadership and contributions to the fashion world.

MRS KOH-LIM WEN GIN
Board Member

Mrs Koh-Lim was Chief Planner and Deputy Chief Executive of the Urban Redevelopment Authority (URA) from 2001 to 2008. Her career with URA spanned over three decades, during which she played a key role in the strategic planning and design of Singapore's city and urban landscape, and the conservation of Singapore's built heritage. She is currently Director of Keppel Land Limited, Board Member of Sentosa Development Corporation, Chairman of Sentosa Cove Resort Management Ltd and Senior Advisor to several private firms. In 2009, Mrs Koh-Lim was conferred the Meritorious Service Award by the Government of Singapore.

DR SURIANI SURATMAN
Board Member

Dr Suriani is Senior Lecturer at the Department of Malay Studies, National University of Singapore. She is trained as a social anthropologist. Her teaching and research cover areas on Malay culture and society. She has conducted research in Singapore, Malaysia and the Philippines. She is currently Deputy Chairman of the Malay Heritage Foundation Board of Directors. She is also a board member of the National Gallery Singapore and National Heritage Board. In addition, Dr Suriani is a potter and has done commissioned creative pieces for Temasek Holdings, The Sentosa Resort and Spa, National Heritage Board, Patron of the Year Award and Singapore International Foundation.

DR MALONE-LEE LAI CHOO
Board Member

Dr Malone-Lee is Director of the Centre for Sustainable Asian Cities, School of Design and Environment at the National University of Singapore (NUS). Prior to joining NUS, Dr Malone-Lee worked in the areas of strategic planning, urban planning policies and heritage conservation. Her current research interests lie in urban sustainability, particularly on its nexus with development, economic growth and city culture. Her more recent research projects have focused on issues of city densification, liveability and well-being, and their links to sustainability benchmarking and assessment. Together with her research team, she has been investigating planning strategies for sustainable growth, particularly for the dense cities in the developing countries of Asia. She is a part-time consultant with the United Nations Economic and Social Commission for Asia and the Pacific (ESCAP).

GUY HARVEY-SAMUEL
Board Member

Mr Harvey-Samuel is Group General Manager, Chief Executive Officer of The Hongkong and Shanghai Banking Corporation Limited (HSBC), Singapore. A member of HSBC's Asian Executive Committee, Mr Harvey-Samuel has direct responsibility for all HSBC operations based in Singapore. He is also a member of the Advisory Board of the National Youth Achievement Award Council and National Arts Council, as well as the boards of Surbana Jurong Private Limited and Jurong Town Corporation.

SEAH KIAN PENG
Board Member

Member of Parliament for the Marine Parade GRC, Mr Seah is also Chief Executive Officer of NTUC Fairprice Co-operative Limited. Mr Seah has worked in both the public and private sectors, and serves in various public and community organisations. He is on the board of International Co-operative Alliance, Singapore Centre for Social Enterprises, Centre for Fathering and Singapore Olympic Foundation. He is a Fellow of the Singapore Institute of Directors and Chartered Institute of Marketing. He also chairs the Harvard Business School Club of Singapore and the Marine Parade Leadership Foundation.

GEORGE HUANG
Board Member

Mr Huang is Managing Director of Amoy Canning Corporation (S) Ltd, a pioneer in the food processing industry. He serves on the boards and committees of various organisations including Singapore Manufacturing Federation and Consumers Association of Singapore. He is also Singapore's Honorary Consul General of the Federal Democratic Republic of Ethiopia.

ANDREAS SOHMEN-PAO
Board Member

Mr Sohmen-Pao is Chairman of BW Group Limited, BW LPG Limited, BW Offshore Limited and Singapore Maritime Foundation. He is also a non-executive director of Sport Singapore and Singapore Symphonia Company Ltd.

Mr Sohmen-Pao was previously Chief Executive Officer of BW Group. He has also served as a non-executive director of Hongkong Shanghai Banking Corporation, the Maritime and Port Authority of Singapore and The Esplanade Co Ltd amongst others. Mr Sohmen-Pao holds an honours degree (BA Hons) from Oxford University and an MBA from Harvard Business School.

MS JAMIE ANG
Board Member

Ms Ang currently heads the Fiscal Policy Directorate in the Ministry for Finance, where she oversees overall fiscal planning and the development of budget policies for ministries as well as strategic planning and economic analysis for the finance ministry. Prior to this, she served as Director for Land and Infrastructure Programmes as well as Director for Social Programmes in the ministry. She has also served in the Ministry of National Development and the Ministry of Health.

WARREN FERNANDEZ
Board Member

Mr Fernandez is Editor-in-Chief of the English/Malay/Tamil Media Group of Singapore Press Holdings (SPH), and concurrently Editor of The Straits Times, the group's flagship daily. He has been with SPH since 1990, and has served in many roles including political correspondent, news editor, deputy political editor, foreign editor and deputy editor. Mr Fernandez graduated with First Class Honours from Oxford University, where he read Philosophy, Politics and Economics, and also has a Master's Degree in Public Administration from Harvard University. He has served on a number of national committees such as the Remaking Singapore Committee, Singapore 21 Committee, Compass, and Cost Review Committee, and sat on the boards of Civil Service College and National Environment Agency. Currently, he is a board member of National Heritage Board, SPH (Overseas) Ltd, and The Straits Times Press Ltd, and is Chairman of the board for The Straits Times School Pocket Money Fund.

KENNETH ER
Board Member and
Chief Executive
Officer, National
Parks Board

Mr Er began his career in National Parks Board (NParks) and has been involved in the planning, implementation and management of parks and streetscapes in the city. In 2003, he was seconded to the Ministry of National Development, where he oversaw policies and was actively involved in the review of legislation pertaining to parks and greenery infrastructure, agri-veterinary issues, and building and construction. Mr Er was subsequently appointed General Manager at Gardens by the Bay, where he played a pivotal role in developing the Gardens from concept to form. He was also concurrently Assistant Chief Executive Officer (Corporate Development & Services) at NParks. He was appointed Chief Operating Officer of Gardens by the Bay in 2012. Mr Er is presently the Chief Executive Officer of NParks.

ORGANISATION STRUCTURE

AS OF 1 OCTOBER 2016

A low-angle photograph looking up into a dense forest. Sunlight filters through the thick canopy of green leaves, creating a dappled light effect. The branches of the trees are silhouetted against the bright sky. The overall mood is serene and natural.

GREENERY FLOURISHES

ENHANCING OUR GREEN INFRASTRUCTURE

Greenery is a cornerstone of Singapore's efforts to create a quality living environment for all. During the year in review, NParks continued to strengthen the country's green infrastructure and create shared green spaces that offer avenues for relaxation, recreation and respite.

01

Achieving a UNESCO milestone

Singapore commemorated her 50th birthday with a meaningful milestone when the Singapore Botanic Gardens was conferred the status of a UNESCO World Heritage Site by the World Heritage Committee on 4 July 2015. It is the first botanic gardens in Asia and the third in the world to be inscribed.

The Gardens was established in 1859, and its legacy is being sustained through a Site Management Plan which outlines Singapore's long-term commitment towards its protection. In May 2015, NParks announced the designation of a 14 ha Nature Area situated within the Buffer Zone of the World Heritage Site, which includes 10 ha of the Learning Forest adjacent to the Gardens.

In November 2015, NParks announced a further expansion of the Learning Forest which will bring the total area of the Singapore Botanic Gardens to 82 ha (including the colonial houses at No. 5 and No. 7 Gallop Road). The Jacob Ballas Children's Garden will also be doubling its current size to 4 ha.

Creating gardens in the heartlands with the people

On 5 April 2015, NParks launched a public engagement exhibition on the new 90 ha Jurong Lake Gardens. The exhibition featured proposals for Jurong Lake Gardens West based on public feedback, such as the inclusion of family-friendly elements and features that will enable visitors to get up close to native wetland plants.

By the time the exhibition drew to a close in May 2015, some 17,700 suggestions had been gathered. These reflected an interest in preserving the tranquility of the area and retaining existing biodiversity hotspots, among others.

NParks has also developed landscape masterplans for the towns of Toa Payoh, Woodlands and Pasir Ris, under the Housing & Development Board's (HDB) Remaking Our Heartlands programme. About 400 residents and stakeholders shared their suggestions on how the towns should be enhanced, and plans include integrating more greenery into these estates.

02

Promoting well-being and social inclusion through our green spaces

Singapore's parks and gardens continue to play an important role in encouraging social inclusion by creating a quality living environment where people from all walks of life can gather for recreation and relaxation.

In August 2015, NParks launched Singapore's first inclusive playground at Bishan-Ang Mo Kio Park in collaboration with the National Council of Social Service. The playground features wheelchair-accessible equipment for children with special needs and is one of five inclusive playgrounds that NParks will build by end 2017. Three of these, including the one at Bishan-Ang Mo Kio Park, are made possible by the Care & Share Movement with donations from the Community Chest's corporate partners such as Shaw Foundation, SMRT Corporation Ltd (SMRT) and Variety, the Children's Charity.

03

01 Ministry of Foreign Affairs Second Permanent Secretary Albert Chua, NParks CEO Kenneth Er, then Minister for National Development Khaw Boon Wan, Prime Minister Lee Hsien Loong, then Minister for Culture, Community and Youth Lawrence Wong, National Heritage Board CEO Mrs Rosa Daniel, and Singapore's Ambassador and Permanent Delegate to UNESCO Andrew Toh unveiling the Singapore Botanic Gardens' UNESCO World Heritage Site plaque

02 The Singapore Botanic Gardens had a busy year of activities. It hosted some 600 educational programmes which reached out to 29,000 participants, and also staged 45 events, exhibitions and musical performances. Many of the concerts took place at the Shaw Foundation Symphony Stage (pictured).

03 An artist's impression of Jurong Lake Gardens, which will be developed around four key design principles – preserving nature and memories, co-creating show gardens, integrating science and nature, and vibrant programming – and feature design elements based on public feedback

ALL SET TO TAKE FLIGHT

When he gets onto the wheelchair swing at the inclusive playground in Bishan-Ang Mo Kio Park, Muhammad Hirwantor feels like he is flying. A wheelchair ramp and safety chain and belt ensure he can use the swing comfortably and securely.

With the introduction of inclusive facilities, a visit to the playground has become a totally different experience for Hirwantor. He used to feel bored when playing with his sisters at the playground because most of the equipment did not cater to his needs. His mother, housewife Saidah Binte Abdul Latif, would put some sand on a table for him to play with, or carry him onto the swing. "I used to envy other children who could use all the equipment at the playground," Hirwantor says. "Now I no longer feel that way."

Saidah recalls how much her son enjoyed the wheelchair swing when he tried it for the first time. "In the past, while he could go on the swing and merry-go-round, there were no safety features and I had to hold onto him when he was on the equipment. Now, I can rest assured that he can fully – and safely – enjoy himself."

"The swing and merry-go-round have wheelchair access and features such as belts and gates which keep me safe, while allowing me to feel free."

MUHAMMAD HIRWANTOR, 12 STUDENT

Muhammad Hirwantor, pictured here on the wheelchair-accessible swing with Charles Tan (left) and Benjamin Tay of the National Council of Social Service, which partnered NParks for the launch of the Bishan-Ang Mo Kio Park inclusive playground

NParks is also spearheading the development of therapeutic gardens, as part of a community-based solution to meet the wellness needs of residents. Developed in consultation with the National University Health System (NUHS), NParks launched Singapore's first therapeutic garden in a public park – the 850 sqm Therapeutic Garden @ HortPark. Designed to contribute to the well-being of all visitors, including those with conditions such as dementia, it will serve as a reference for future

therapeutic gardens that NParks is designing and developing across Singapore.

In another major green milestone, Coney Island Park was opened by Coordinating Minister for Infrastructure and Minister for Transport Khaw Boon Wan in October 2015. The 50 ha park gives Singaporeans the opportunity to experience and enjoy a rich, biodiverse environment while enhancing and protecting the wide variety of habitats found in the area.

A NATURAL PRESCRIPTION FOR MENTAL WELL-BEING

Tired, stressed and error-prone? The prescription could be a walk in the park.

The Therapeutic Garden @ HortPark was developed based on evidence-based design principles which draw on environmental psychology theories such as the Biophilia Hypothesis, Attention Restoration Theory and Stress Reduction Theory. These theories highlight the restorative effects that greenery has on people who are experiencing stress or mental fatigue.

NParks has also embarked on four studies to better understand how green spaces enhance the quality of life for Singaporeans. The first, Park Prescription, aims to substantiate the positive effects of physical activity in parks with clinical research, while the second study on Horticultural Therapy investigates the effects of parks and gardening on the mental health of the elderly. These projects are undertaken in collaboration with NUHS and National University of Singapore (NUS), with the Park Prescription study also involving Khoo Teck Puat Hospital. The third is a Dementia Prevention Programme jointly conducted with NUHS and People's Association, and the fourth is a study by the Centre for Urban Greenery and Ecology (CUGE) which looks into the impact of community gardening programmes on well-being and social cohesion.

Besides improving health and general well-being, the presence of parks in cities has also been shown to improve productivity.

SUSTAINABLE RESOURCES ON CONEY ISLAND PARK

No water? No electricity? No problem. At Coney Island Park, which was opened to the public on 10 October 2015, recycled materials and sustainable water and energy sources help to reduce the carbon footprint and make the island self-sustainable.

One of the environmental initiatives at the 50 ha park is a zero-energy self-sufficient toilet. The electricity needed to power the toilet pumps is generated from solar energy, the water used for flushing and hand washing is harvested from rainwater, and diffused sunlight is used to provide light indoors.

Lamp posts in the park are also attached with solar panels to harvest energy from the sun during the day and provide lighting at night. Timber salvaged from uprooted Casuarina trees was collected and recycled for park signage, seats, benches, exhibits and the boardwalk.

Exploration area constructed using Casuarina wood

Solar panels and plantings on the roof of the zero-energy self-sufficient toilet

04 Our extensive streetscape, or roadside greenery, forms the backbone of our City in a Garden.

05 Emeritus Senior Minister Goh Chok Tong, Minister Khaw Boon Wan and Advisor to MacPherson SMC Ms Tin Pei Ling flagging off cyclists at the launch of the Central Urban Loop, which is part of the Park Connector Network

Enhancing the roads with beautiful streetscapes

In the past year, more than 61,000 trees were planted and 25 new species introduced, and more Nature Ways were created. Totalling 68 km island-wide, these Nature Ways provide ecological linkages that facilitate the movements of birds and butterflies, help bring biodiversity into the urban infrastructure and improve the quality of the living environment.

Singapore's green legacy has been strengthened further with the number of Heritage Trees endorsed by NParks growing to 256, with 38 new entries in the year in review. Making up a large proportion of this are 22 Rain Trees in the Avenue of Heritage Trees at Connaught Drive, which forms part of the Civic District Tree Trail (www.nparks.gov.sg/CivicDistrictTreeTrail).

Linking communities through the Park Connector Network

In September 2015, NParks celebrated 25 years of the Park Connector Network (PCN) and the launch of its fifth PCN loop, the 36 km Central Urban Loop. This brought the total distance of park connectors to over 300 km.

The park connector between East Coast Park Area A and Gardens by the Bay was also opened to the public in May 2015. This enables runners, cyclists and other park users to travel along a continuous 20 km track, all the way from Changi Beach Park to the Marina Bay area.

NParks also commenced detailed design works on the first phase of the Round Island Route which will connect more than 3.5 million residents to natural, cultural, historical and recreational sites around Singapore.

TAKING THE SCENIC ROUTE

"Had a bad day at work? You can head to a park near your office or home to chill out."

**MOHAMED FADZLI HAYOF, 36
SELF-EMPLOYED**

The scenery along the Park Connector Network (PCN) makes a 5 km route seem more like 2 km, says Mohamed Fadzli Hayof, who cycles along the PCN almost every day to work and back.

His family joins him on weekends when they go running or cycling together. "We either use the Kallang Park Connector to make our way from Kallang to Stadium, or the East Coast Park extension if we are heading from the east to Marina Barrage," says Fadzli (or Faz, as he prefers to be called).

Faz finds the PCN very useful, especially for people who are not confident about cycling on the road. "I don't have to worry so much about my son's safety when he rides."

There are also more people using the PCN now compared to a few years ago, he observes. Besides cyclists, people who jog, rollerblade or use scooters will also find the PCN useful.

One of the things he is looking forward to is the Round Island Route (RIR), a 150 km park connector that will go around the island. "People will be able to cycle or jog from their home to the city area without worrying about cars and other vehicles."

Besides the safety aspect, Faz finds it cooler to ride on the PCN than on the roads, and having close contact with greenery can help people to de-stress, he says.

Mohamed Fadzli Hayof cycling along the East Coast Park Area A extension, which links East Coast Park to Gardens by the Bay

Scaling new heights with greenery enhancements

During the year in review, through the Skyrise Greenery Incentive Scheme, NParks supported many organisations in introducing more greenery to their premises, enhancing the overall quality of the living environment in Singapore. In 2015, the area of green roofs in Singapore increased from 65 ha to 72 ha. New additions to the scheme included Holy Innocents' Primary School and Banyan Home @ Pelangi Village, amongst others.

At the 2015 Skyrise Greenery Awards organised by NParks in November, 12 developments were recognised for their greening efforts. Eleven developments were also certified under the Landscape Excellence Assessment Framework (LEAF) in 2015, bringing the total number certified to 32. LEAF gives recognition to projects that showcase innovations in design and greenery implementation, and which demonstrate high quality landscapes and biodiversity enhancement.

As part of the initiative by the Municipal Services Office (MSO) to centralise services, NParks set up the Municipal Landscapes Division in June 2015 to undertake greenery maintenance for other public agencies. This covers trees, turf and other vegetation in about 4,000 locations, totalling about 2,500 ha. The centralisation of greenery maintenance and management has helped to streamline the process of feedback management, with NParks acting as the point of contact. Greenery is better managed

under a single agency, and greenery maintenance and productivity standards are improved with the implementation of mechanisation and other system improvements.

Greenery enhancements are also taking place at MRT stations, improving the overall quality of the living environment. During the year in review, NParks worked with SMRT and the Land Transport Authority (LTA) to complete greening works at four MRT stations – Admiralty, Mountbatten, Lakeside and Paya Lebar – with a further 12 slated for completion by March 2017. In all, 40 stations have been approved for greenery upgrading over a five-year period.

In other initiatives aimed at incorporating greenery into urban spaces, trials are being conducted on green roof mats for bus stops at Old Choa Chu Kang Road and Jalan Ubi, and Ang Mo Kio MRT station. NParks is also working with SMRT and LTA to explore ways to implement green cladding on road and MRT viaduct columns to improve the living environment.

06 SkyTerrace@Dawson, an estate by HDB, was the only development to receive both the Skyrise Greenery Award and LEAF certification in 2015.

07 Pilot implementation of greening works at Mountbatten MRT station involved introducing green creepers to covered linkways around the station for a greener and more pleasant environment.

DIVERSITY COUNTS

ENRICHING BIODIVERSITY IN OUR URBAN ENVIRONMENT

Against the urban backdrop of a city state, Singapore has continued to make strong strides in biodiversity conservation. Efforts have led to more regular sightings and encounters with wildlife, thereby increasing the quality of our living environment.

01 Mountain bikers enjoying the 1.6 km mountain biking trail at Chestnut Nature Park (South), Singapore's first Nature Park with separate mountain biking and hiking trails

02 The Ubin Living Lab is an integrated facility for field studies, education and research, and community outreach.

03 Students from ITE College East presented nest boxes which they had helped build for the Blue-throated Bee-eater (*Merops viridis*) to Senior Minister of State, Ministry of National Development Desmond Lee.

04 Garden City Fund Chairman Professor Leo Tan, SMS Desmond Lee and President Tony Tan at the launch of the Sisters' Islands Marine Park Public Gallery, which provides an overview of the Marine Park and includes a 3D diorama of its dive trails

Consolidating conservation efforts with new masterplan

NParks announced the Nature Conservation Masterplan (NCMP) in June 2015, marking another major step in the consolidation of Singapore's biodiversity conservation efforts. The plan integrates the various programmes and projects under the thrusts of conservation of key habitats, habitat enhancement, restoration and species recovery, applied research in conservation biology and planning, and community stewardship.

For the year in review, together with the Centre for Liveable Cities, NParks organised "Biophilia and the Future of Sustainable Cities" – the first symposium in Singapore on integrating nature into urban design. An ideal case study of a biophilic city, Singapore is an example of how cities can replicate and incorporate elements of natural systems into the built environment, thereby bringing about restorative effects to the mental well-being of city dwellers.

Creating Nature Parks

To protect nature reserves, NParks has created Nature Parks as buffer zones. Two projects that were completed in the past year were the Zhenghua Nature Park Extension and Chestnut Nature Park (South), both of which extended the green buffer for the Central Catchment Nature Reserve.

Work on Windsor Nature Park began in mid 2015 and the park will be opened by 2017. When completed, it will feature a small freshwater wetland, a trail network with boardwalks, lookout platforms and shelters. These parks will help reduce visitorship pressure on the Reserve by providing alternative venues for the public to enjoy nature-related activities.

Restoration works at the Bukit Timah Nature Reserve are currently in progress, and weekend access to the summit has been re-opened since April 2015.

Conserving Ubin for future generations

NParks seeks to conserve Singapore's rich and diverse habitats so that everyone can have the opportunity to experience nature and enjoy its rustic environment. In 2015, NParks launched a Shoreline Feasibility Study on Pulau Ubin and completed a habitat enhancement programme with the installation of pilot floating wetlands at Pekan Quarry and the Sensory Trail ponds.

Community partners and members of the public also planted 670 trees in an effort to restore forest and mangrove habitats while the Friends of the Ubin Network (FUN) members developed "The Ubin Way", a code of conduct guiding ecologically and socially responsible behaviour on the island. In February 2016, NParks opened the first phase of the Ubin Living Lab, a repurposed facility which enables greater outreach to students.

Raising awareness of marine biodiversity

The Marine Conservation Action Plan (MCAP), which takes reference from the NCMP, encapsulates NParks' efforts in conserving Singapore's marine biodiversity. One key focus of the MCAP is the creation of the Sisters' Islands Marine Park which spans about 40 ha, encompassing Sisters' Islands and the western reefs of St John's Island and Pulau Tekukor.

In July 2015, President Tony Tan Keng Yam opened the Sisters' Islands Marine Park Public Gallery on St John's Island. The Gallery showcases the rich marine biodiversity in Singapore's waters. In November 2015, the new Sisters' Islands Marine Park Dive Trail was opened to the public, raising awareness of Singapore's biodiversity.

“If we make it second nature for our kids to play outdoors and experience our biodiversity, it’s more likely they will grow up appreciating the beauty of our natural environment.”

**MIKE CHEE, 41
OPERATIONS MANAGER**

To Mike Chee, the child-friendly facilities at Sungei Buloh Wetland Reserve (SBWR) are not the typical amenities one would find in a park. And he loves them this way.

At SBWR’s Junior Adventure Trail, for example, young visitors experience what it is like to be a crab or mudskipper in the mangroves. They get to duck under prop roots and cross the mangrove river on a pulley boat.

“As city-dwellers who prefer convenience, we often stop our kids from playing in the grass, from jumping in the mud, from dancing in the rain. We need to change that mindset and stop depriving our kids from doing what should come naturally to them,” says Mike.

He also mentions West Coast Park as another green space with good facilities for children. Equipping green spaces with playgrounds makes them more attractive to children and provides them with greater incentive to spend time outdoors instead of staying in front of a computer screen. “We need to take them outdoors often; the graphics are better outside!”

For Mike, greenery is important because it offers tranquillity and a temporary escape from city life. And he appreciates how convenient it is to get to a green space in Singapore. “I’d say we have the best of both worlds – a city and a garden.”

SHARING A LOVE FOR THE OUTDOORS

Mike Chee, pictured here with wife Audrey and daughters Victoria, Kaitlyn and Ashley at Sungei Buloh Wetland Reserve

Conserving Singapore’s wetlands

In another conservation initiative, NParks and the Urban Redevelopment Authority officially opened Kranji Marshes, a 56.8 ha freshwater marshland, in conjunction with World Wetlands Day on 2 February 2016. Kranji Marshes provides important habitats for the conservation of biodiversity, especially marsh birds, in the Kranji area.

In October 2015, NParks also established a new mangrove arboretum at the Sungei Buloh Wetland Reserve Coastal Trail for mangrove conservation, education and public outreach. The arboretum was made possible with a donation of \$0.5 million by Kikkoman Singapore.

NParks is also working with the Tropical Marine Science Institute to reintroduce cultured giant clams into Singapore waters. Both organisations embarked on a transplantation trial of the True Giant Clam (*Tridacna gigas*) in April 2015 and juvenile Fluted Giant Clam (*Tridacna squamosa*) in August 2015. The trials will help determine the appropriate living environment and acclimation procedures for the giant clams.

On Pulau Ubin, the species recovery programme saw the planting of over 700 orchids from 15 critically endangered species. Two bat houses were also installed for bats to roost.

NParks has also put in place a long-term species recovery plan for the Raffles’ Banded Langur (*Presbytis femoralis*), which has a population of about 50 today. It is taking a multi-pronged approach that includes habitat enhancement, regular monitoring and research into the behaviour, ecology and demographics of the species.

Discovery and recovery of species

Species discovery and recovery is another important aspect of biodiversity conservation. It provides Singaporeans with access to the rich flora and fauna in the country, contributing to a richer quality of life for her residents. In June 2015, NParks announced that researchers from the Singapore Botanic Gardens had discovered *Hanguana rubinea* and *Hanguana triangulata*, two species of forest plants that are new to science and endemic to Singapore.

During the year in review, NParks also implemented the species recovery action plan for the Singapore Freshwater Crab (*Johora singaporensis*). This marked a first for a single species of invertebrate under the International Union for Conservation of Nature.

05 Butterflies such as the Blue Glassy Tiger (*Ideopsis vulgaris macrina*) can be observed at Kranji Marshes’ grass habitats.

06 Spotted at Kranji Marshes, the Purple Swampen (*Porphyrio porphyrio*) has long legs and large feet for wading in shallow water and walking over floating vegetation in the marsh.

07 The native Sheath-Covered Spathe Robiquetia (*Robiquetia spathulata*) orchid is one of the species currently being propagated and reintroduced across Pulau Ubin as part of the species recovery programme.

TRACKING THE COMMON REDSHANK WITH GEOLOCATORS

From Sungei Buloh Wetland Reserve to the Qinghai-Tibet Plateau in Northwestern China and back – that is how far some adult Common Redshanks (*Tringa totanus*) travelled during the last migratory season, according to geolocators fitted on some of the birds for an NParks survey.

The geolocators, which store location data on a memory unit attached to the bird, were used to tag and track the movement of about 100 Common Redshanks. The devices weigh about a gramme each and recorded the movement of these birds as they travelled along their migratory routes.

NParks managed to recapture five of the tagged Common Redshanks when they returned in September and October 2015. The downloaded data indicated that one of the birds, a juvenile, stayed mostly in Singapore and the immediate region, including Thailand. The adult birds travelled to Northwestern China to breed before returning to Sungei Buloh, a few stopping at Thailand, Myanmar and Southwestern China (Sichuan) along the way.

A Common Redshank with a geocator attached to its left foot

The route taken by one of the adult Common Redshanks from Sungei Buloh to Northwestern China and back

08 The *Hanguana rubinea* (left) and *Hanguana triangulata* were discovered by researchers from the Singapore Botanic Gardens, and show how Singapore contains many thriving habitats for biodiversity.

09 At the first NParks Garden Bird Watch in April 2015, birds such as the Pink-necked Green Pigeon (*Treron vernans*) were spotted at Bishan-Ang Mo Kio Park.

10 Visitors can climb a 10.65 m tall Raptor Tower to get a panoramic view of Kranji Marshes.

Grounding conservation efforts in research

Biodiversity conservation efforts which seek to enhance the quality of the living environment in Singapore are grounded in scientific research. During the year in review, the proceedings from the Johor Strait Marine Biodiversity Survey conducted as part of the Comprehensive Marine Biodiversity Survey (CMBS) were published. The CMBS was sponsored by Asia Pacific Breweries, Care-for-Nature Trust Fund, Keppel Care Foundation, Shell Companies in Singapore and the Air Liquide Group. It involved 48 international and local scientists, staff from NParks and the National University of Singapore, as well as volunteers.

NParks has also been conducting long-term monitoring of biodiversity. An example is its bird ringing effort which has been carried out at Sungei Buloh Wetland Reserve since 1990, with nearly 11,000 birds of 140 species tagged.

Such monitoring efforts have revealed interesting migration patterns. A male Northern Pintail (*Anas acuta*) made a rare stopover in Singapore in February 2016. The pintail is a migratory duck with a breeding range that includes eastern Siberia. The last time the species was sighted here was in 1992 in Senoko South.

Encouraging community stewardship through citizen science

In April 2015, several national citizen science programmes were launched under NParks' Community in Nature Biodiversity Watch series to encourage community stewardship of biodiversity through participation in biodiversity monitoring. The first of these was Garden Bird Watch, which saw over 400 participants spreading out across 60 locations islandwide over 10 days to conduct bird surveys. Data collected from the counts will help NParks understand long-term population trends for garden birds.

Other citizen science programmes launched during the year in review included Butterfly Watch and BioBlitz. The latter saw members of the public joining naturalists in an intensive 12-hour field study to document the diversity of flora and fauna at Pasir Ris Park. In total, an estimated 265 species of plants and animals including the rare Buffy Fish Owl (*Ketupa ketupu*) and *Sivistella chekjava* – a species of cricket that can be found only in Singapore – were identified there.

Celebrating biodiversity efforts

In June 2015, the annual Festival of Biodiversity was held at VivoCity to celebrate the community's efforts in conserving Singapore's natural heritage and highlight how biodiversity contributes to a quality living environment in Singapore. Into its fourth year and in celebration of SG50, the Festival of Biodiversity raised awareness of plants and animals closely linked to Singapore's heritage.

Participating in international biodiversity initiatives

NParks has also been participating actively in regional and global biodiversity conservation initiatives. In June 2015, the National Biodiversity Centre hosted the 16th ASEAN Working Group on the Coastal and Marine Environment to profile Singapore's coastal and marine management credentials and discuss the health of the coastal and marine ecosystem. NParks and the Centre for International Law, National University of Singapore also organised a seminar on the United Nations Convention on the Law of the Sea to discuss contemporary hot-button issues related to the management and use of the high seas.

A group of people, including children and adults, are crouching on a sandy beach, looking at something on the ground. In the foreground, a large, dark crab is visible, partially submerged in shallow water. The background shows a clear sky and the ocean.

PARTNERSHIP GROWS

ENGAGING AND INSPIRING COMMUNITIES

The greening of Singapore cannot be achieved by NParks alone. People from all walks of life – from students and community gardeners to corporate partners and other volunteers – play an important part in creating a quality living environment for all residents.

01 Focusing on local plants and animals, the preschool educational resource materials reached out to over 80,000 preschoolers in more than 1,600 schools.

02 Students from My First Skool @ Blk 528 Hougang learning about the Tembusu tree (*Cyrtophyllum fragrans*) from the picture word cards, which are part of the preschool educational resource materials

03 Youths are trained to lead tours, enabling them to fulfil the requirements of the service learning volunteer programme, learn new skills and contribute to society.

04 NParks staff from Streetscape share about the nature of their work with students from Jurong Junior College via a hands-on demonstration.

05 Students removing mussels from aquaria as part of the Marine Eco-toxicity Biomonitoring Programme, which aims to monitor the levels of eco-toxicity in the coastal areas in Singapore using physiological, behavioural and DNA tests on Green Mussels (*Perna viridis*) that have been left out at various sites

06 A youth participating in a mangrove clean-up at Coney Island Park as part of the Project Island-A-Hand initiative

07 Students from Bukit View Secondary School planting trees in their school compound as part of Green Wave

Getting the next generation on board

Engaging the next generation on nature, biodiversity and conservation remained an important priority for NParks in the past year as Singapore continued to transform herself into a City in a Garden and enhance the quality of life for her residents.

In line with this, NParks provides educators with localised resources which focus on native plants and animals. In May 2015, it launched the first comprehensive set of preschool educational resource materials, which was developed in consultation with the Ministry of Education's (MOE) preschool branch. NParks also collaborated with MOE to incorporate greenery as a theme in Geography as well as Character and Citizenship Education textbooks. DVDs on Singapore's biodiversity and books on a wide range of nature-related topics – from dragonflies and hornbills to award-winning nature photography – were also distributed to 383 schools.

Many programmes were also conducted during the year in review to engage students in the effort to create a quality living environment for all residents. Under NParks' Every Child A Seed programme, over 45,000 Primary Three pupils from more

than 190 primary schools, including five Special Education schools, received seed-planting kits to help inculcate the young with an appreciation of greenery. Another programme, Nature Cares, reached out to five new schools and involved some 430 students. To raise awareness of Singapore's biodiversity, an interactive skit titled "Secrets of the Swamp", based on a book by Neil Humphreys, reached out to 50,000 students from 30 primary schools in the past year. More than 500 Primary Five pupils from the Gifted Education Programme in nine schools also visited parks and nature reserves as part of an annual Learning Journey.

As part of the Young Nature Surveyor Badge Programme, NParks collaborated with the Singapore Scouts Association and Gardens by the Bay to promote biodiversity and provide scouts with an opportunity to serve as biodiversity ambassadors. NParks also hosted school visits to various parks and gardens, gave presentations on Singapore's biodiversity, organised sharing sessions on wetlands conservation and horticulture, and gave talks on career opportunities in the landscape industry.

Encouraging active participation

Twenty new schools came on board the Community in Nature's (CIN) Greening Schools for Biodiversity initiative, with more than 400 teachers and students involved in the targeted planting of biodiversity-attracting plants, guided by results of student-led biodiversity audits of their school compounds. Students also brainstormed and implemented outreach efforts to increase appreciation and awareness of biodiversity among their peers. Under this initiative, the new Native Plant Conservation Programme involved four schools in caring for native plants within their school grounds.

Aimed at encouraging schools to play an active role in the conservation of biodiversity, the Nature Outreach Workshop equipped more than 100 upper primary and secondary students and teachers with skills on how to plan and run nature-related activities in their schools and beyond. The Marine Eco-toxicity Biomonitoring Programme reached out to six schools which monitored the levels of eco-toxicity in Singapore's coastal areas.

The inaugural Biodiversity Week for Schools was held in May 2015 in observance of the International Day for Biological Diversity. The biodiversity-related activities reached out to 129 preschools, 187 primary schools, 168 secondary schools and five international and tertiary schools. More than 60 schools also participated in Green Wave, either by planting trees at their campus or through tree mulching.

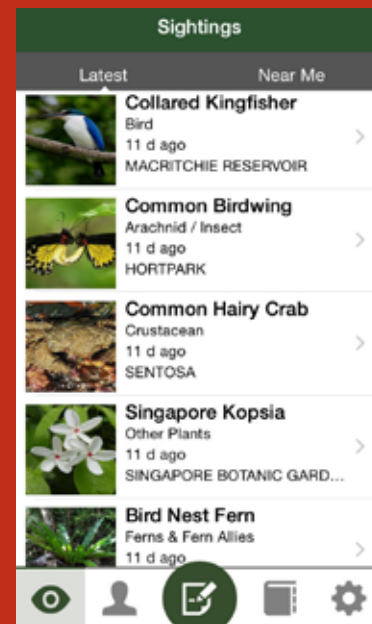

Tertiary students were also involved in programmes such as species recovery projects at Pulau Ubin, invasive species management at Venus Loop, the planting of saplings and shrubs along the Simei Park Connector, and Project Island-A-Hand at Pulau Ubin and Coney Island Park, an environmental service project organised by Outward Bound School. Under the NParks Junior Guides Pilot Programme, interested youths were also trained to lead visitors along the Singapore Botanic Gardens Heritage Trail.

MAPPING OUT SINGAPORE'S FLORA AND FAUNA WITH SGBIOATLAS

Members of the public who spot any interesting animals or plants can now share their sightings using the citizen science app SGBioAtlas.

Launched in April 2015, the app aggregates crowd-sourced information to map the distribution of flora and fauna throughout Singapore using Geographical Information System (GIS) technology. All uploaded sightings are plotted out on an atlas on the Biodiversity and Environment Database System (BIOME, biome.nparks.gov.sg), which serves as a single repository of biodiversity and environment-related data contributed by government agencies, educational institutions, non-governmental organisations and members of the public.

The app was used extensively during the first Garden Bird Watch and Butterfly Watch, which are part of the NParks CIN Biodiversity Watch. Over 650 citizen scientists fanned out across the island to conduct surveys, and used the SGBioAtlas app to submit sightings of birds and butterflies.

The SGBioAtlas app allows users to easily record and identify biodiversity sightings, which will contribute to an existing online database. It can be downloaded free from the Apple App Store and Google Play.

Youths from Outward Bound School conducting a bird survey at Coney Island Park using the SGBioAtlas app

Creating buzz at the parks

During the year in review, more than 3,300 events were organised in various parks, catering to a wide range of visitors and interests and helping to enhance the quality of life in Singapore. These included signature events such as the monthly Gardeners' Day Out at HortPark and Fort Canning Park Heritage Night Walks in August 2015, and Satay Night Live, which was held at the newly-revamped Empress Place and Esplanade Park in November 2015.

In celebration of 25 years of the Park Connector Network (PCN) and to promote a safe and responsible PCN user culture, various ground-up initiatives such as bike maintenance clinics, PCN etiquette workshops, networking rides as well as tree plantings were rolled out to further engage the community.

08 Our parks and gardens played host to many programmes in the past year, including art workshops where participants drew inspiration from their lush surroundings.

PURSUING DIFFERENT INTERESTS OUTDOORS

"I usually go for walks or have picnics at our green spaces, but I also like dining in our parks and attending concerts and performances outdoors."

**ASHLEIGH ANN CHONG, 23
COMMUNICATIONS EXECUTIVE**

There is no shortage of activities one can do outdoors, according to Ashleigh Ann Chong. Hiking at MacRitchie Reservoir Park, cycling on Pulau Ubin, skating at East Coast Park, and watching a concert or dining at one of the restaurants at Singapore Botanic Gardens are just some examples.

Fort Canning Park also plays host to a variety of productions such as Ballet Under the Stars, Shakespeare in the Park and Films at the Fort, she points out. "Chances are there's something for everyone, no matter what their preference is."

Ashleigh's favourite green spaces include HortPark and Henderson Waves by night, when the bridge is nicely lit up, very scenic and not too hot or crowded.

Greenery not only plays an important role in the ecosystem, it also lowers the surrounding temperature and makes living in Singapore more comfortable, she says. "It is also aesthetically pleasing, making the environment look less stark and urban."

She feels more young people are beginning to appreciate this. "With social media platforms like Facebook and Instagram, youths are venturing into these green spaces, appreciating the beauty of the environment and sharing their observations with their friends and families."

One of Ashleigh's favourite Instagram spots is a lone tree at Upper Seletar Reservoir Park. "It's a great place to watch and photograph the sunset," she shares.

Ashleigh Ann Chong, pictured here with friend Clarence Tan at Fort Canning Park's Gothic Gates

09 More than 350 residents joined Deputy Prime Minister and Coordinating Minister for Economic & Social Policies, Tharman Shanmugaratnam, and Minister for National Development and Second Minister for Finance, Lawrence Wong, in remembering Mr Lee Kuan Yew by planting 53 trees at Jurong Lake Park. The park will eventually be part of the new Jurong Lake Gardens.

Cycle-in Movies that emphasised safety and track etiquette were organised as part of the OCBC-NParks Ride Safe programme at the Eastern Coastal Loop and North Eastern Riverine Loop, and were well-received by the public.

Another popular activity at the parks is nature photography, and one of the highlights of 2015 was the culmination of the Singapore Garden Photographer of the Year competition. The best photos from this competition, as well as other photography competitions organised by NParks to date, were featured in the Singapore Garden Photographer of the Year coffee table book which was launched in November 2015 to commemorate the country's Golden Jubilee.

Remembering our Chief Gardener Mr Lee Kuan Yew

On 19 March 2016, Prime Minister Lee Hsien Loong, grassroots advisors and 3,000 residents attended a remembrance day event in honour of Singapore's founding Prime Minister and Chief Gardener Mr Lee Kuan Yew at Bishan-Ang Mo Kio Park. Eleven *Cratoxylum formosum* trees, commonly known as the Pink Empat, were planted. Mr Lee Kuan Yew had planted a Pink Empat in Farrer Circus in 1963, sparking off an island-wide greening movement that has continued till today.

At the Istana grounds, the day was marked by the planting of a Tembusu tree by President Tony Tan Keng Yam and Mrs Tan.

CELEBRATING SINGAPORE'S JUBILEE YEAR

Mass tree planting, a concert reminiscent of the 1950s, and the launch of a new festival celebrating community gardens – these were some of the many activities that were organised to mark Singapore's Jubilee Year.

During the Clean and Green SG50 (CG SG50) Mass Tree Planting which took place from August to December 2015, some 20,000 people planted over 5,500 trees at more than 50 parks, park connectors and Nature Ways island-wide. At the Singapore Botanic Gardens, visitors had the opportunity to re-live the 1959 Aneka Ragam Ra'ayat or "People's Variety Show" in August 2015, as part of NParks' SG50 Concert Series in the Park. During the show, Prime Minister Lee Hsien Loong unveiled the Singapore Botanic Gardens' UNESCO World Heritage Site plaque and officially named the SG50 orchid – *Papilionanthe* Singapore Golden Jubilee. NParks also organised five other free outdoor concerts at various parks as part of the SG50 celebrations.

Deputy Prime Minister and Coordinating Minister for National Security Teo Chee Hean interacting with students at the launch of the CG SG50 campaign

Jubilee Year was also commemorated with the launch of the Community Garden Festival, which saw the judging and weigh-in for the inaugural Community Garden Edibles Competition. The competition received overwhelming response, with over 900 entries.

Nurturing the spirit of volunteerism

Volunteers continued to play an integral role in helping NParks to achieve the vision of a City in a Garden and create a quality living environment for all residents. In September 2015, 20 long-service volunteers were lauded for their dedication and contributions at the annual Volunteer Appreciation Ceremony.

During the year in review, there were some 1,500 active volunteers participating in a wide range of activities such as visitor services, guided walks, gardening, outreach programmes, conservation programmes and marine biodiversity surveys. For example, volunteers took part in horticulture-centric maintenance activities at Bishan-Ang Mo Kio Park, the Intertidal Watch citizen science programme, and Forest Clean-Up 2015.

In September 2015, NParks launched the inaugural Community Garden Festival to bring the gardening community together as well as to commemorate Singapore's Jubilee Year. Besides the creation of five commemorative SG50 gardens at HortPark by over 250 community gardeners, the Festival also saw the judging and weigh-in for the inaugural Community Garden Edibles Competition which received overwhelming response with over 900 individual and group entries in 12 vegetable and fruit categories. Community gardens also continued to thrive indoors, with 67 companies participating in the Community in Bloom (CIB) Indoor Gardening initiative. As of March 2016, there were more than 1,000 community gardens island-wide in public and private housing estates, schools and organisations.

To encourage even greater community stewardship and ownership of green spaces, NParks built on the success of the Friends of Ubin Network (FUN) to launch the Friends of the Parks initiative. Members of the community comprising regular park users and stakeholders help promote active and responsible use of the parks through ground-led programmes and initiatives.

REAPING THE BENEFITS OF GREEN THERAPY

Tan Keng Leng, pictured here with fellow volunteer gardeners Tan Sok Oon (left) and Judy Neo at the Therapeutic Garden @ HortPark

“We can do more to encourage residents, especially the elderly, to garden and grow their own food.”

**TAN KENG LENG, 67
RETIREE**

Gardening is not only good exercise; it is an opportunity for residents to get to know one another and could even help them lower the cost of living by sharing the fruits (and vegetables) of their labour, says Tan Keng Leng.

Encouraging more people to visit the new Therapeutic Garden @ HortPark and try their hand at gardening, Keng Leng points out that the space

is wheelchair-accessible, with raised moveable beds that allow older people to garden without having to kneel or squat. The raised beds also have holes in the middle where bags can be attached, making it more convenient for elderly gardeners to gather plant cuttings.

“For elderly living on their own, it would be good if they could come here and interact with others instead of being cooped up at home,” he says.

Keng Leng himself became a volunteer gardener after retiring two years ago. On most Wednesdays, he can be found at HortPark propagating plants, pruning and weeding at the Greenhouse and Edibles Garden. While he does not have a preference for any specific plant species, he would like to learn more about fruit and vegetable crops as well as healing plants as these have practical health benefits.

10 Community gardeners from South West District at Talk Bird Sing Song, one of the five SG50 CIB Gardens which were created at HortPark as part of the Community Garden Festival

11 At the SGfuture citizen engagement series, participants came together to share their views, aspirations and ideas for the future through discussions and dialogue sessions.

Looking forward

NParks also had the opportunity to engage youths, working adults and families to discuss the future of our City in a Garden through the SGfuture citizen engagement sessions. The conversation series on “A Cleaner, Greener and Smarter Home” sought to envisage the future living environment in Singapore through the collective input of the public, as SG50 drew to a close. More than 300 people participated in three engagement sessions and went on guided tours of Bishan-Ang Mo Kio Park, Singapore Botanic Gardens, Pasir Panjang Nursery and HortPark. Participants gave feedback that they enjoyed the sessions, which also gave them the chance to collaborate with different government agencies to chart their future by sharing their views on how Singaporeans can play a bigger role in creating a more liveable and sustainable Singapore.

The Plant-A-Tree programme is a platform for organisations and individuals to actively participate in the greening of our City in a Garden, by donating the cost of a young tree and planting it themselves.

Charity Registration Number/Unique Entity Number:
T02CC1634C
Charity Registration Date: 19 November 2002
IPC Number: IPC000104
Auditor: Deloitte & Touche

The Garden City Fund (GCF) is a registered charity and an Institute of Public Character (IPC), with its registered address at National Parks Board, Singapore Botanic Gardens, 1 Cluny Road, Singapore 259569.

The GCF seeks to enhance the enjoyment of our City in a Garden by working with corporations and individuals to support the development of amenities and special features in Singapore’s green spaces; community activities and programmes that promote awareness, research and education in nature and conservation; and citizen involvement to encourage greater ownership of our City in a Garden.

The Board of NParks serves as the trustee of the GCF and has appointed the GCF Management Committee to plan, develop, promote and manage the GCF in accordance with its Trust Deed.

The Management Committee comprises eight members. All are non-executive members except for GCF Secretary Dr Leong Chee Chiew, who is also the Deputy Chief Executive Officer, Professional Development & Services Cluster at NParks and the Commissioner of Parks & Recreation.

Between 1 April 2015 and 31 March 2016, the total amount of cash donations received through GCF was about \$8.8 million.

The members of the seventh GCF Management Committee appointed from 1 November 2014 to 31 October 2016 are:

| | |
|------------------|---------------------------|
| Chairman | Professor Leo Tan Wee Hin |
| Treasurer | Vincent Lien Jown Jing |
| Secretary | Dr Leong Chee Chiew |
| Members | Tan Khin Nguan |
| | Mrs Fu E-Len |
| | Goh Kong Aik |
| | Mrs Kirtida Mekani |
| | Dr Malone-Lee Lai Choo |

As part of the GCF Accountability and Governance Framework, any member of the Board, Committee or Sub-committee has to give prior written disclosure of any actual or potential conflict of interest for any transaction or project in connection with GCF, and will not be able to participate or cast a vote in the transaction/project.

Fundraising for green causes

Various private fundraising initiatives were organised by corporations and individuals to support efforts to create a quality living environment in Singapore. A charity gala event was held on 17 September 2015 with support from **City Developments Limited**. It raised over \$330,000 to support education and outreach programmes at the Singapore Botanic Gardens.

Long-time NParks volunteer and supporter **Han Jok Kwang** also raised funds and donated over \$270,000 to GCF to mark his 30th wedding anniversary. The donations were used to support habitat enhancement and outreach activities on Coney Island Park and other park programmes.

Other fundraising partnerships included **Club 21**’s charity redemption programme in support of the Jacob Ballas Children’s Garden; **The Body Shop**’s support for tree planting through the sale of selected beauty products; and **Tokio Marine Life Insurance Singapore**’s fundraising campaign to support the planting of mangrove saplings at Sungei Buloh Wetland Reserve.

Tree planting

Over 500 corporations and 50,000 individuals have participated in the Plant-A-Tree programme, pledging and planting more than 25,000 trees since its inception in 2007.

Part of the Plant-A-Tree programme, Clean and Green SG50 Mass Tree Planting 2015 took place from 1 August to 31 October 2015 as part of NParks’ ongoing efforts to create a quality living environment for all residents. It received strong support from corporate partners including **April Group, IKEA, Pratt & Whitney, Singapore Pools, Singtel, Tokio Marine Life Insurance Singapore** and **United Parcel Service** as well as individuals. Under the programme, some 5,500 trees were planted across the island, with over 100 species of trees planted at more than 50 locations along parks, park connectors and Nature Ways.

Temasek also donated \$100,000 to plant 100 trees at Fort Canning Park to enhance its greenery and reintroduce selected primary forest species to the park.

Rejuvenating the Singapore Botanic Gardens’ icons

At the Singapore Botanic Gardens, various icons are being rejuvenated to protect their heritage value for future generations. Burkill Hall’s original identity as an Anglo-Malayan plantation-style house is being restored through a repainting sponsored by **AkzoNobel**. The sponsorship also covers the repainting of the Gardens’ iconic Bandstand.

NParks is also embarking on a series of enhancements to rejuvenate various features of the 20-year-old National Orchid Garden. A \$10 million donation by **Sembcorp Industries** – the largest single donation to GCF by a corporate partner to date – will partially fund enhancements to the 600 sqm Cool House which simulates high elevation sites in the tropics. To be named The Sembcorp Cool House, it will have a new climate control system which allows researchers to grow and flower rare orchids that occur naturally only at higher elevations.

Also within the National Orchid Garden, the 380 sqm Yuen Peng McNeice Bromeliad Collection enclosure will be enhanced, partly through a contribution by the **family of the late Lady Yuen Peng McNeice**. The collection showcases bromeliads from about 520 taxa, including representatives from 23 genera and 320 species. An anonymous donor also donated a sum via GCF to support enhancements to the 350 sqm Tan Hoon Siang Mist House. Named after Tan Hoon Siang, Singapore’s very own gold medal winner at the Chelsea Flower Show in the early 1950s, the Mist House features a selection of unique, uncommon and award-winning tropical lowland orchid hybrids and species set in a lush mist forest.

Supporting the wetlands and nature reserves

Kikkoman Singapore donated \$500,000 for the new mangrove arboretum at the Sungei Buloh Wetland Reserve Coastal Trail for mangrove conservation, education and public outreach. Besides the arboretum, their sponsorship covers an education programme designed around the interesting features of the mangrove arboretum, which aims to engage young children between the ages of 4 and 6 to play and learn in a natural environment.

Long-time GCF partner **HSBC** pledged a donation of \$300,000 and the support of staff volunteers for a comprehensive two-year biodiversity survey at the Bukit Timah Nature Reserve. The study is aimed at improving understanding of the conservation status and distribution of plants and animals in the 163 ha Reserve.

Nurturing talent

Lee Foundation contributed \$420,000 towards training the next generation of botanists and biodiversity scientists in Southeast Asia. This will fund three scholarships for a new Master of Science programme in Plant and Fungal Taxonomy, Diversity, and Conservation at the Royal Botanic Gardens, Kew, as well as a Tropical Identification course for a number of local and regional students.

Promoting safe cycling

OCBC Bank has committed to contribute \$90,000 over the next three years for a safe cycling programme conducted at different parks across the island. The OCBC-NParks Ride Safe programme aims to educate cyclists on the importance of safe cycling around pedestrians and other park users, while improving the quality of life through participation in these activities.

Commemorating Singapore’s Jubilee Year

Sembcorp Industries presented a three-day carnival and series of concerts at the Singapore Botanic Gardens to commemorate Jubilee Weekend. The activities celebrated the Gardens’ rich cultural and botanical heritage and its contribution to enhancing the quality of life in Singapore, as well as its inscription as Singapore’s first UNESCO World Heritage Site.

The Singapore Garden Photographer of the Year coffee table book was also produced to commemorate Singapore’s 50th anniversary. The book brought together prize-winning entries from three photography competitions organised by NParks to date. These included the Singapore Garden Photographer of the Year competition (2015), the City in a Garden competition (2012) and the BiodiverCity competition (2010). Gold sponsors for the book included **Jardine Cycle and Carriage, Kwang Im Tong Hood Cho Temple, Lee Foundation** and **Woh Hup (Private) Limited**, and the Bronze sponsor was **Kingsmen**.

Remembering Mr Lee Kuan Yew

In a fundraiser organised in memory of GCF’s founding patron Mr Lee Kuan Yew, over \$500,000 worth of donations were received in support of urban ecology and innovation projects that help improve the quality of the living environment. Major donations came from **Allgreen Properties Limited, Credit Suisse, HSBC, Satsuma Shipping Pte Ltd, WongPartnership LLP** and **Sumitomo Mitsui Banking Corporation**.

Future plans and commitment

As a conduit for green initiatives, the charity will continue to engage members of the public and support conservation efforts, research, outreach and educational initiatives under NParks. The aim is to cultivate a love for the environment, promote a sense of ownership, and encourage the community to play a stronger role in preserving Singapore’s legacy as a City in a Garden.

Visit www.gardencityfund.org for more information.

A man wearing a white safety helmet, yellow safety glasses, and black gloves is climbing a tree. He is wearing a red t-shirt with a white graphic that says "ASIA PACIFIC TREE CLIMBING". He is smiling and looking towards the camera. The background is a blurred green forest with a blue sky. The text "EXPERTISE LEADS" is overlaid on the right side of the image.

EXPERTISE LEADS

**ENHANCING COMPETENCIES IN THE LANDSCAPE AND
HORTICULTURE INDUSTRY**

Capability development, whether at the individual or sectoral level, continues to be important in creating a quality living environment in Singapore and realising the vision of a City in a Garden. NParks' industry development and training programmes are aimed at supporting innovation, strengthening capabilities and cultivating the expertise needed to support this effort.

01

Uplifting the industry

The Landscape Productivity Roadmap, which was launched in 2011, will continue to chart the course for productivity reform in the landscape industry till 2020 and support the sector in its efforts to create a quality living environment for all residents. To date, more than 50 companies have been supported under the Landscape Productivity Grant, which was introduced in 2013 to support contractors' efforts to mechanise their operational processes.

NParks also continued to work closely with the industry to address the challenge of attracting and retaining talent. The second intake of a joint scholarship programme by NParks, Institute of Technical Education (ITE) and Landscape Industry Association of Singapore (LIAS) led to the successful placement of six ITE students, while NParks' Landscape Apprenticeship Programme resulted in eight apprentices placed in seven companies. In September 2015, NParks and e2i co-organised a Human Resource (HR) Masterclass for landscape contractors to help them develop good HR practices, better manage their manpower and better attract and retain local talent.

01 ITE student Yu Zhang tending to plants at the nursery of Greenology Pte Ltd as part of the joint scholarship programme by NParks, ITE and LIAS

02 As part of the Asia Pacific Tree Climbing Championship, children learnt to climb trees under the watchful eye of professionals during the Young Arborist workshop.

03 Holland-Bukit Panjang Town Council hosted the pilot programme of the Resident Gardeners project, which recruited 10 resident gardeners now in the employment of one of the town council's landscape contractors.

Providing the impetus for training

To further raise the profile of the industry, the Tripartite Cluster for Landscape Industry announced the Progressive Wage Model (PWM) for the landscape maintenance sector in April 2015. The PWM will enable local maintenance workers to achieve sustainable real wage increases through skills upgrading and productivity improvements. It encourages landscape workers to upgrade themselves under the Landscape Workforce Skills Qualifications (WSQ) Framework developed by NParks and the Singapore Workforce Development Agency (WDA). During the year in review, there were 1,700 sign-ups from 230 companies for WSQ training courses. This was a three-fold increase from previous years.

02

03

In response to industry demand for workplace-based training and assessment arising from the PWM, the Centre for Urban Greenery and Ecology (CUGE) introduced several initiatives including a mobile training van, in-house training options as well as weekend and evening classes.

As part of the overall effort to build capabilities and enhance the living environment for Singaporeans, CUGE introduced new programmes covering a wide range of topics from tree transplanting and tree support systems, to plant epidemiology and urban ecology strategies. A programme on Climbing Trees Using Single Rope Technique (SRT) gave participants a better understanding of the technical and safety aspects of SRT. CUGE also teamed up with the Singapore Arboriculture Society to organise the Asia Pacific Tree Climbing Championship which attracted a record 60 competitors from seven Asia Pacific countries – Australia, Hong Kong, Japan, Malaysia, New Zealand, Singapore and Taiwan.

Supporting continuous learning

To engage mature residents, CUGE worked with the Holland-Bukit Panjang Town Council to train resident gardeners in a pilot project where town council landscape contractors employ these residents to maintain the neighbourhood green spaces. CUGE is looking to roll out the programme to other town councils in the North West District.

As one of WDA's Continuing Education and Training partners, CUGE also participated in WDA's Learning Fest at the Lifelong Learning Institute in November 2015 and its SkillsFuture Credit Roadshow in March 2016.

04

05

Engaging industry practitioners

NParks continued to engage industry practitioners through various ways to enhance the living environment in Singapore. These included organising seminars and demonstrations to share research findings, discuss key urban challenges, and co-create research and development solutions to address national challenges. CUGE also published guide books to help practitioners design and maintain parks and gardens efficiently, and embarked on research studies to better understand how green spaces benefit residents.

Sharing knowledge, strategies and experiences

In November 2015, the International Skyrise Greenery Conference (ISGC) was held in conjunction with the sixth Skyrise Greenery Awards to highlight greening strategies and solutions that help enhance the quality of the living environment, and discuss emerging trends and priorities of the urban greenery, design and landscape communities in Asia.

Taking place alongside ISGC was GreenUrbanScape Asia 2015, the region's leading exhibition for urban design, landscape and greenery, and the inaugural GreenUrbanScape Asia Congress. These conferences attracted close to 500 delegates from 18 countries.

NUMERICAL MODELS MEET NATURE IN NPARKS' TREE CARE STRATEGY

NParks is collaborating with Nanyang Technological University to better understand the impact of wind forces on trees using a numerical technique known as the Finite Element Model.

In this approach, a mathematical model of a tree is constructed using software and subdivided into simpler, disjoint components called finite elements. The response of these elements to different forces (such as gusts of wind) can be assembled to construct the response of the larger structure (the tree).

The ability to model the dynamic behaviour of trees helps NParks to better understand how trees react to strong wind gusts and refine our tree risk management programme. For example, research has revealed that the discordant vibration of branches and leaves during strong wind can help to dissipate a significant amount of wind energy from being transmitted to the trunk of the tree. This data helps guide NParks on our tree care management strategy.

This image shows a three-dimensional view of an uprooting tree. When the tree is uprooted, stresses are generated throughout the lower trunk, root system and surrounding soil. Should NParks' tree inspection officers need to trim the roots of leaning trees, this helps them assess which roots should be retained.

04 Minister Lawrence Wong being briefed on new innovations showcased at GreenUrbanScape Asia 2015

05 A volunteer guide explaining to Indonesian delegates on the lightning protection system for some of our heritage trees

International outreach

During the year in review, NParks hosted many foreign visitors keen to find out more about Singapore's greening programmes and how NParks was involved in creating a quality living environment for all residents. The visitors included officials from countries such as China (including Hong Kong), India, Indonesia, Japan, Laos, Malaysia, Mongolia, Tatarstan, the Philippines, and Vietnam. CUGE was also invited by the Muscat Municipality and New Delhi Municipal Council to organise a four-day

international programme on Singapore Greenery Planning and Management in Oman and Singapore respectively.

NParks, under the leadership of the Ministry of National Development, also signed a Memorandum of Understanding with the Tianjin Eco-city Administrative Committee to advise on the design and development of the Sino-Singapore Friendship Garden.

06 Community Parks Senior Manager Ms Amanda Galistan (left) with Parks Victoria staff exchange coordinator, Ms Angela Gardiner, on a visit to Brimbank Park Playscape during Amanda's exchange programme with Parks Victoria. Brimbank Park Playscape is an inclusive playground that provides a range of experiences for young children with different abilities.

07 Ms Hairani binte Osman, Visitor Services Officer, Singapore Botanic Gardens, and recipient of the PS21 Star Service Award, is known for her warm and friendly manner when sharing her knowledge with park visitors.

08 During Kindness Day 2015, NParks staff had the opportunity to accompany beneficiaries of Voluntary Welfare Organisations during activities at our parks and gardens.

09 Over the years, the PCN has evolved beyond its initial function to connect parks. It now provides visitors with opportunities to experience nature, and is a platform for communities with shared interests to gather.

Nurturing NParks' human resources

Talent development continues to be a key focus as Singapore works towards creating a quality living environment and a City in a Garden for her residents. During the year in review, NParks offered four undergraduate scholarships, three overseas Merit Award sponsorships and five postgraduate scholarships to deserving staff and external candidates. NParks also continued to expand its collaboration with reputable overseas botanical institutions and gardens to provide professional exchange opportunities for its staff, with the latest addition to the network being the Royal Botanic Gardens Melbourne. In late 2015, one officer attended a professional exchange programme with Parks Victoria in Melbourne. To date, 10 NParks staff have been placed on overseas exchange programmes.

The regular Hort Colloquiums continued to provide rich opportunities for NParks' officers to share their knowledge and experiences with one another. One example is the fifth roadshow on the Plant Matrix, a tool to help staff easily select suitable plants for a given site condition.

Staff well-being remained a priority of NParks. In 2015, NParks received the Singapore Health Award (Platinum) in recognition of its holistic workplace health initiatives. NParks' staff and projects were also recognised at the Public Service Awards. Ms Hairani binte Osman, Visitor Services Officer, Singapore Botanic Gardens, received the PS21 Star Service Award while the Park Connector Network (PCN) received the ExCEL Innovation Spotlight Award.

Family bonding at NParks

The 2015 calendar was filled with social, recreational and corporate activities that brought members of the NParks family closer together as they worked towards the shared goal of improving the living environment for all residents.

The year in review began with the annual Staff Conference on 1 April 2015, where Chief Executive Officer Kenneth Er paid tribute to Mr Lee Kuan Yew and shared NParks' priorities for the year.

The annual Kindness Day, which was held in November 2015, brought smiles and laughter to the children of the Salvation Army's Child Care Centres who visited various parks and gardens, and NParks' staff who volunteered their time to accompany the

children. In the year in review, NParks also began providing one day of unrecorded leave per year for officers to volunteer, in their personal capacity, at any local charity with an Institution of Public Character (IPC) status.

In February 2015, the NParks Family was set up as a networking platform for past and present NParks staff. NParks Family members, who comprise former staff who had worked in the organisation for five years or more, attended the SG50 Concert Series in the Park, NParks Staff Mass Tree Planting, and NParks Year-End Get Together. NParks staff were also given the opportunity to visit the Night Safari with their family and friends, as part of NParks Family Day 2015.

CORPORATE GOVERNANCE FY 2015

Board Members

NParks is overseen by a Board comprising 11 members. The current Chairman is Mrs Christina Ong.

All the Board members are non-executive members, except the Chief Executive Officer, Mr Kenneth Er. The Board derives its strength from the extensive and complementary backgrounds, qualifications and experience of its members.

The Board's key responsibilities are to:

- Endorse broad directions, policies and strategies relating to NParks' achievement of its vision, mission and objectives, and performance of its functions;
- Oversee NParks' operating and financial performance taking into account NParks' budget, expenditure, assets, transactions and projects;
- Provide guidance on matters relating to NParks' parks and infrastructure development programmes; and
- Approve NParks' tenders (as members of the relevant Tender Boards).

The Board has established the following committees to assist it in carrying out its duties:

- Human Resource and Compensation Committee;
- Audit Committee;
- Operations Risk Committee; and
- Garden City Fund Management Committee.

The Human Resource and Compensation Committee's role is to review key human resource policies and provide strategic oversight of related risks. The Audit Committee ensures a high standard of corporate governance through independent reviews of internal controls, financial reporting processes and financial

risks. In addition, the Audit Committee reviews the audited financial statements, as well as the audit plans and observations of external and internal auditors. The Operations Risk Committee provides strategic oversight on NParks' operations risk management framework, including review of NParks' operations risks. The Garden City Fund Management Committee plans, develops, promotes and manages the Garden City Fund in accordance with its Trust Deed.

Board's Conduct of its Affairs

The Board meets four times a year and as and when necessary to address any significant matters that may arise. To enable the Board to fulfil its responsibilities, the Management Team strives to provide the Board members with adequate information during Board meetings and on an ongoing basis. The Board also has direct and independent access to the Management Team for further information and explanation, if necessary.

Accountability and Audit

The Board's accounts are audited by the Auditor-General or such other auditor may be appointed annually by the Minister in consultation with the Auditor-General. The auditor engaged for the financial year which ended on 31 March 2016 was Deloitte & Touche. The auditor's findings in the course of the annual financial audit were submitted to the Board and also reported to the Ministry of National Development. The audited financial statements and the auditor's report were also presented to Parliament.

Internal Control Framework

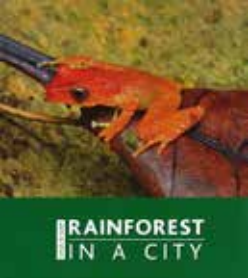

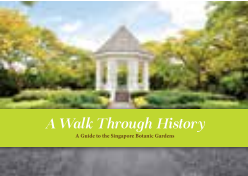

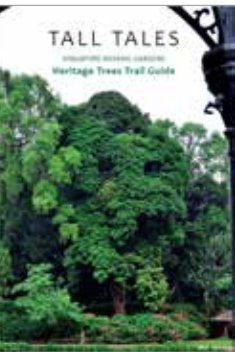

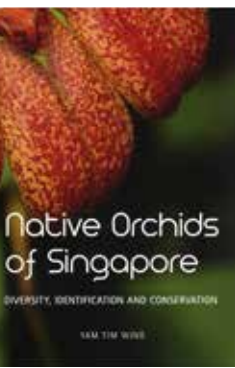

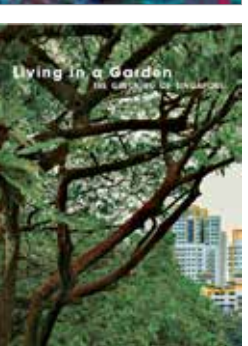

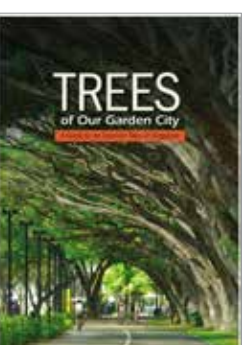

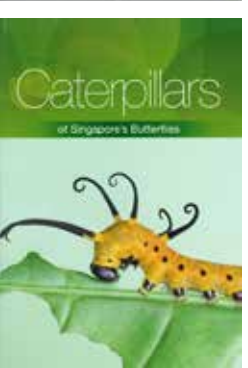

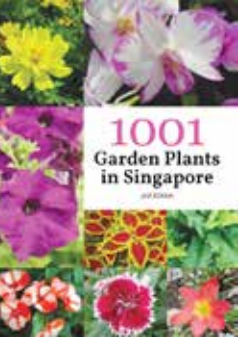

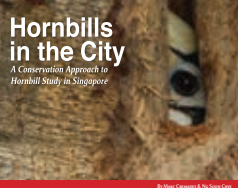

NParks' internal control system ensures that assets are safeguarded, proper accounting records are maintained, and financial information is reliable. The overall control framework includes:

- An organisation structure with clearly defined authority and delegation limits and reporting mechanisms to higher levels of management and to the Board;
- An annual budgeting and quarterly financial reporting system for all operating units that enables progress against annual plans and objectives to be monitored;
- Compliance with the provisions of the National Parks Board Act, Chapter 198A, Singapore Financial Reporting Standards, Government Instruction Manuals, Finance and PSD Circulars and Minutes for policies and procedures related to operations, human resource management and financial controls and regulations; and
- A risk management framework which ensures close monitoring with proper mitigating measures for all identified high risk areas.

FINANCIAL REVIEW

Income

The Group’s income comprised mainly rental income from souvenir kiosks and food & beverage outlets in Singapore Botanic Gardens and Fort Canning Park. The income for the year was \$24.8 million, a marginal increase of 3% from \$24 million in FY 2014.

| Income | FY 2015 | FY 2014 | Increase/(Decrease) | |
|----------------------|---------|---------|---------------------|----------|
| | \$'000 | \$'000 | \$'000 | % Change |
| Rental income | 9,797 | 8,254 | 1,543 | 19 |
| Admission charges | 1,876 | 2,438 | (562) | (23) |
| Plan fees | 2,765 | 3,377 | (612) | (18) |
| Composition amounts | 249 | 1,399 | (1,150) | (82) |
| Agency fees | 1,560 | 1,568 | (8) | (1) |
| Interest income | 2,690 | 2,747 | (57) | (2) |
| Miscellaneous income | 5,865 | 4,232 | 1,633 | 39 |
| | 24,802 | 24,015 | 787 | 3 |

Operating Expenditure

The Group’s expenditure for the year was \$238.5 million. The 1% increase from last year’s expenditure was mainly due to an increase in staff costs offset by a decrease in general and administrative expenses.

| Operating Expenditure | FY 2015 | FY 2014 | Increase/(Decrease) | |
|--------------------------------------|---------|---------|---------------------|----------|
| | \$'000 | \$'000 | \$'000 | % Change |
| Staff costs | 88,163 | 80,966 | 7,197 | 9 |
| Maintenance and improvement of parks | 104,559 | 105,006 | (447) | (1) |
| General and administrative expenses | 34,687 | 38,482 | (3,795) | (10) |
| Depreciation | 11,099 | 10,537 | 562 | 5 |
| | 238,508 | 234,991 | 3,517 | 1 |

Capital Expenditure

The Group’s capital expenditure for the year was \$10.7 million. The increase in capital expenditure was mainly due to the improvement works carried out in Singapore Botanic Gardens and the enhancement of information technology infrastructure.

CAPITAL EXPENDITURE FOR FY 2015 & FY 2014

| Capital Expenditure | FY 2015 \$'000 | FY 2014 \$'000 | Increase/(Decrease) \$'000 | % Change |
|---|-------------------|-------------------|-------------------------------|----------|
| Building, structures & other capital improvements | 3 | 11 | (8) | (73) |
| Equipment | 2,366 | 3,075 | (709) | (23) |
| Motor vehicles | 232 | 332 | (100) | (30) |
| Development work-in-progress | 8,050 | 4,511 | 3,539 | 78 |
| | 10,651 | 7,929 | 2,722 | 34 |

Financial Position

As at 31 March 2016, the Board’s total assets stood at \$370.9 million, an increase of 6% over last year. Non-current assets and current assets represent 32% and 68% of total assets respectively. Non-current assets consisted mainly of leasehold land and buildings and structures at Singapore Botanic Gardens and Fort Canning Park. Capital and reserves stood at \$180.7 million, while current and non-current liabilities stood at \$69.9 million and \$120.3 million respectively.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY
STATEMENT BY NATIONAL PARKS BOARD

- In our opinion,
- (a) the accompanying financial statements of National Parks Board (“NParks”) and its subsidiary (the “Group”), set out on pages 72 to 95 are properly drawn up in accordance with the provisions of the National Parks Board Act, Chapter 198A (the “Act”) and Statutory Board Financial Reporting Standards (“SB-FRS”) so as to present fairly, in all material respects, the financial position of the Group and NParks as at 31 March 2016, and the financial performance, changes in equity of the Group and NParks and cash flows of the Group for the financial year ended on that date;
 - (b) proper accounting and other records have been kept, including records of all assets of NParks whether purchased, donated or otherwise; and
 - (c) the receipt, expenditure, investments of moneys and the acquisition and disposal of assets by NParks during the financial year have been in accordance with the provisions of the Act.

On behalf of the National Parks Board and its subsidiary

Christina Ong
Chairman

Kenneth Er Boon Hwee
Chief Executive Officer

INDEPENDENT AUDITOR’S REPORT TO THE MEMBERS OF THE BOARD OF NATIONAL PARKS BOARD

REPORT ON THE FINANCIAL STATEMENTS

We have audited the accompanying financial statements of National Parks Board (“NParks”) and its subsidiary (the “Group”) which comprise the statements of financial position of the Group and NParks as at 31 March 2016, the statements of comprehensive income and statements of changes in equity of the Group and NParks, and the consolidated statement of cash flows of the Group for the year then ended, and a summary of significant accounting policies and other explanatory information, as set out on pages 72 to 95.

MANAGEMENT’S RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the provisions of the National Parks Board Act, Chapter 198A (the “Act”) and Statutory Board Financial Reporting Standards (“SB-FRS”), and for such internal controls as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

AUDITORS’ RESPONSIBILITY

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Singapore Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal controls relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

OPINION

In our opinion, the consolidated financial statements of the Group and the statement of financial position, statement of comprehensive income and statement of changes in equity of NParks are properly drawn up in accordance with the provisions of the Act and SB-FRS so as to present fairly, in all material respects, the financial position of the Group and NParks as at 31 March 2016, and the financial performance and changes in equity of the Group and NParks, and cash flows of the Group for the year ended on that date.

INDEPENDENT AUDITOR’S REPORT TO THE MEMBERS OF THE BOARD OF NATIONAL PARKS BOARD

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

MANAGEMENT’S RESPONSIBILITY FOR COMPLIANCE WITH LEGAL AND REGULATORY REQUIREMENTS

Management is responsible for ensuring that the receipts, expenditure, investment of moneys and the acquisition and disposal of assets, are in accordance with the provisions of the Act. This responsibility includes implementing accounting and internal controls as management determines are necessary to enable compliance with the provisions of the Act.

AUDITOR’S RESPONSIBILITY

Our responsibility is to express an opinion on management’s compliance based on our audit of the financial statements. We conducted our audit in accordance with Singapore Standards on Auditing. We planned and performed the compliance audit to obtain reasonable assurance about whether the receipts, expenditure, investment of moneys and the acquisition and disposal of assets, are in accordance with the provisions of the Act.

Our compliance audit includes obtaining an understanding of the internal controls relevant to the receipts, expenditure, investment of moneys and the acquisition and disposal of assets; and assessing the risks of material misstatement of the financial statements from non-compliance, if any, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal controls. Because of the inherent limitations in any accounting and internal control system, non-compliances may nevertheless occur and not be detected.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on management’s compliance.

OPINION

In our opinion:

- (a) the receipts, expenditure, investment of moneys and the acquisition and disposal of assets by NParks during the year are, in all material respects, in accordance with the provisions of the Act; and
- (b) proper accounting and other records have been kept, including records of all assets of NParks whether purchased, donated or otherwise.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY

NOTES TO FINANCIAL STATEMENTS
31 MARCH 2016

1 GENERAL

National Parks Board (“NParks”) is a statutory board under the Ministry of National Development (“MND”) established under the National Parks Board Act (Chapter 198A).

The Board has its registered office at Singapore Botanic Gardens, 1 Cluny Road, Singapore 259569.

The primary activities of NParks are to develop, manage and promote the National Parks and Nature Reserves as valuable reserves for recreation, conservation, research and education and to develop, upgrade, manage and maintain the public parks, open spaces on behalf of the Government.

There has been no significant changes in the nature of these activities during the financial year.

The principal activities of the subsidiary are described in Note 9 to the financial statements.

The financial statements of NParks for the financial year ended 31 March 2016 were authorised for issue by members of the Board on 20 July 2016.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF ACCOUNTING – The financial statements have been prepared in accordance with the historical cost basis, except as disclosed in the accounting policies below, and are drawn up in accordance with the provisions of the Act, and Statutory Board Financial Reporting Standards (“SB-FRS”), including INT SB-FRS and Guidance Notes.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability which market participants would take into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of SB-FRS 102 *Share-based Payment*, leasing transactions that are within the scope of SB-FRS 17 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in SB-FRS 2 *Inventories* or value in use in SB-FRS 36 *Impairment of Assets*.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

ADOPTION OF NEW AND REVISED STANDARDS – On 1 April 2015, the Group adopted all the new and revised SB-FRSs and Interpretations of SB-FRS (“INT SB-FRS”) and SB-FRS Guidance Notes that are effective from that date and are relevant to its operations. The adoption of these new/ revised SB-FRSs, INT SB-FRSs and SB-FRS Guidance Notes does not result in changes to the Group’s accounting policies and has no material effect on the amounts reported for the current or prior years.

Management has considered and is of the view that the adoption of the SB-FRSs, INT SB-FRSs and Amendments to SB-FRSs that were issued as at the date of authorisation of these financial statements but not effective until future periods will have no material impact on the financial statements of the Group and NParks in the period of their initial adoption.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY

NOTES TO FINANCIAL STATEMENTS
31 MARCH 2016

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont’d)

BASIS OF CONSOLIDATION – The consolidated financial statements incorporate the financial statements of NParks and entities (including special purpose entities) controlled by NParks (its subsidiary). Control is achieved when NParks:

- Has power over the investee;
- Is exposed, or has rights, to variable returns from its involvement with the investee; and
- Has the ability to use its power to affect its returns.

NParks reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

Consolidation of a subsidiary begins when NParks obtains control over the subsidiary and ceases when NParks loses control of the subsidiary. Specifically, income and expense of a subsidiary acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the date NParks gains control until the date when NParks ceases to control the subsidiary.

Where necessary, adjustments are made to the financial statements of the subsidiary to bring its accounting policies into line with the Group’s accounting policies.

In NParks’s separate financial statements, investment in subsidiary is carried at cost less any impairment in net recoverable value that has been recognised in income or expenditure.

FINANCIAL INSTRUMENTS – Financial assets and financial liabilities are recognised on the statement of financial position when the Group becomes a party to the contractual provisions of the instrument.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial instrument and of allocating interest income of expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premium or discounts) through the expected life of the financial instrument, or where appropriate, a shorter period. Income and expenses are recognised on an effective interest basis for debt instruments.

Financial assets

All financial assets are recognised and de-recognised on a trade date basis where the purchase or sale of an investment is under a contract whose terms require delivery of the investment within the timeframe established by the market concerned, and are initially measured at fair value plus transaction costs.

Loans and receivables

Trade and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as “loans and receivables”. Loans and receivables (including trade and other receivables, cash at bank and deposits with AGD) are measured at amortised cost using the effective interest method less impairment. Interest is recognised by applying the effective interest method, except for short-term receivables when the effect of discounting is immaterial.

Impairment of financial assets

Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the financial assets have been impacted.

For financial assets carried at amortised cost, the amount of the impairment is the difference between the asset’s carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

For financial assets that are carried at cost, the amount of the impairment loss is measured as the difference between the asset’s carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables where the carrying amount is reduced through the use of an allowance account. When a trade receivable is uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited to the income or expenditure. Changes in the carrying amount of the allowance account are recognised in income or expenditure.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY
NOTES TO FINANCIAL STATEMENTS
31 MARCH 2016

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd)

Impairment of financial assets (cont'd)

For financial assets measured at amortised cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through income or expenditure to the extent that the carrying amount of the financial asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities and equity instruments

Classification as debt or equity

Financial liabilities and equity instruments issued by the Group are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. Equity instruments are recorded at the proceeds received, net of direct issue costs.

Pursuant to the Finance Circular Minute ("FCM") No. 26/2008 on Capital Management Framework ("CMF"), equity injection from the Government is recorded as share capital.

Financial liabilities

Trade and other payables are initially measured at fair value, net of transaction costs, and are subsequently measured amortised cost, using the effective interest method, with interest expense recognised on an effective yield basis.

Derecognition of financial liabilities

The Group recognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire.

LEASES – Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease unless another systematic basis is more representative of the time pattern in which use benefit derived from the leased asset is diminished. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease income.

The Group as lessee

Rentals payable under operating leases are charged to income or expenditure on a straight-line basis over the term of the relevant lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY
NOTES TO FINANCIAL STATEMENTS
31 MARCH 2016

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd)

PROPERTY, PLANT AND EQUIPMENT – Property, plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is charged so as to write off the cost of property, plant and equipment over their estimated useful lives, using the straight-line method on the following bases:

| | |
|---|--|
| Leasehold land | – Over the lease periods of 87 to 93 years |
| Buildings, structures, capital and other improvements | – 20 years |
| Office equipment, furniture and fittings | – 5 to 10 years |
| Laboratory and gardening equipment | – 7 years |
| Motor vehicles | – 8 to 10 years |

Construction-in-progress included in property, plant and equipment is not depreciated as these assets are not available for use. These are carried at cost, less any recognised impairment loss. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimates accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. The gain or loss arising on disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amounts of the asset and is recognised in income or expenditure.

IMPAIRMENT OF TANGIBLE ASSETS – At the end of each reporting period, the Group reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately as an expense.

Where an impairment loss subsequently reversed, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately as income.

PROVISIONS – Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY
NOTES TO FINANCIAL STATEMENTS
31 MARCH 2016

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd)

GOVERNMENT GRANTS – Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and the grants will be received. Government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred capital grant in the statement of financial position and transferred to income or expenditure on a systematic and rational basis over the useful lives of the related assets. This treatment also applies to assets transferred from other government organisations and other donated assets.

Other government grants are recognised as income over the periods necessary to match them with the costs for which they are intended to compensate, on a systematic basis. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in income or expenditure in the period in which they become receivable.

The value of land at the Singapore Botanic Gardens and the Fort Canning Park that vested in NParks when it was established in June 1990 was taken to the deferred capital grants account. The value of all other assets net of liabilities transferred from the former Parks and Recreation Department of Ministry of National Development (PRD) to NParks in June 1990 and July 1996 amounting to \$4,528,275 was taken to the capital account.

TRUST AND AGENCY FUNDS – Trust and agency funds are set up to account for funds held in trust where NParks is not the owner and beneficiary of the funds received from the Government and other organisations. The receipts and expenditure in respect of agency funds are taken directly to the funds accounts and the net assets relating to the funds are shown as a separate line item in the statement of financial position. Trust and agency funds are accounted for on the accrual basis.

NParks administers the funds on behalf of the holders of these funds. Upon dissolution of these funds, the remaining moneys in these funds shall be returned to the owners of the funds.

REVENUE RECOGNITION – Revenue is recognised to the extent that it is probable that the economic benefits will flow to NParks and the revenue can be reliably measured. Revenue is measured at the fair value of consideration received or receivable.

Rental income

Rental income receivable under operating leases is recognised in surplus or deficit on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

Admission charges

Admission charges are recognised upon the sale of admission tickets to visitors.

Composition amounts

Composition amounts are recognised on the issuance of the notice of offence to offenders.

Agency fees

Where it is probable that the economic benefits will flow to the Group and the revenue and costs, if applicable, can be reliably measured, agency fees are recognised over the period in which the services are completed.

Plan fees

Plan fees are recognised over the period in which services are completed.

Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY
NOTES TO FINANCIAL STATEMENTS
31 MARCH 2016

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd)

Dividend income

Dividend income from investments is recognised when the shareholders’ rights to receive payment have been established.

Miscellaneous income

Miscellaneous income comprising income derived from consultancy fees, sale of publications, souvenirs and orchid plantlets, course fees, and park usage and barbeque permit fees are recognised in the period in which they are earned. Liquidated damages are recognised as income when the right to claim such liquidated damages from contractors are established. Compensation collected from contractors whose work resulted in damage to trees and plants are recognised upon issuance of the notice of offence.

RETIREMENT BENEFITS COSTS – Payments to defined contribution retirement benefit plans are charged as an expense when employees have rendered the services entitling them to the contributions. Payments made to state-managed retirement benefit schemes, such as the Singapore Central Provident Fund, are dealt with as payments to defined contribution plans where the Group’s obligations under the plans are equivalent to those arising in a defined contribution retirement benefit plan.

Defined benefit retirement obligations due to pensionable officers are recognised in the statement of financial position in accordance with the Pensions Act (Cap. 225, 2004 Revised Edition). Provision for pension costs for eligible retired employees is estimated by management based on the most recent valuation performed once every three years by professional actuaries. For pension costs, the cost of providing benefits is determined using the projected unit credit method. Remeasurement, comprising actuarial gains and losses is reflected immediately in the statement of financial position with a charge or credit recognised in other comprehensive income in the period in which they occur.

Remeasurement recognised in other comprehensive income is reflected immediately in accumulated surplus and will not be reclassified to income or expenditure. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- Service cost (including current and past service cost);
- Net interest expense or income; and
- Remeasurement.

For all active members of the scheme, the “projected accrual benefit” is based on the scheme’s accrual formula and upon service as of the valuation date, but using the employee’s scheme salary, projected to the age at which the employee is assumed to leave active service. For inactive members, it is the total benefit. The defined benefit obligation/project benefit obligation/plan liability is the discounted present value of the “projected accrued benefits”. The service cost is the corresponding value of benefits earned by active members over the year as a result of one more year of service.

EMPLOYEE LEAVE ENTITLEMENT – Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the end of the reporting period.

CONTRIBUTION TO CONSOLIDATED FUND – Under Section 13(1)(e) and the First Schedule of the Singapore Income Tax Act, Chapter 134, the income of the Group is exempt from income tax.

In lieu of income tax, NParks is required to make contribution to the Government Consolidated Fund in accordance with the Statutory Corporations (Contributions to Consolidated Fund) Act, Chapter 319A. The provision is based on the guidelines specified by the Ministry of Finance and is computed based on the net surplus of the Group for each of the financial year at the prevailing corporate tax rate for the Year of Assessment. Contribution to consolidated fund is provided for on an accrual basis.

CASH AND CASH EQUIVALENTS IN THE STATEMENT OF CASH FLOWS – Cash and cash equivalents in the statement of cash flows comprise cash at bank and deposits placed with the Accountant-General’s Department (“AGD”) that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY

NOTES TO FINANCIAL STATEMENTS
31 MARCH 2016

3 CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group’s accounting policies, which are described in Note 2, management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The Group did not make any material judgements that have significant effect on the amounts recognised in the financial statements.

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below:

Depreciation of and impairment loss on property, plant and equipment

The cost of property, plant and equipment are depreciated on a straight-line basis over their useful lives. The Group estimates the useful lives of these property, plant and equipment to be within 5 to 93 years, based on the estimated useful lives of the assets. The carrying amounts are disclosed in Note 10 of the financial statements. Changes in the expected level of usage, technological developments and economic conditions could impact the economic useful lives and the residual values of these assets, therefore future depreciation charges could be revised.

Impairment losses would be made for property, plant and equipment whenever there is objective evidence that the assets are impaired. The required level of impairment losses to be made is estimated by reference to the estimated value in use or price quotations from independent third parties.

Impairment loss on trade receivables

The Group evaluates whether there is any objective evidence that trade receivables are impaired and determines the amount of impairment loss as a result of the inability of the debtors to make required payments. The Group bases the estimates on the ageing of the trade receivables balance, credit-worthiness of the debtors and historical write-off experience. If the financial conditions of the debtors were to deteriorates, actual write-offs would be higher than estimated.

Valuation of defined benefits obligations

The Group and the Singapore Government jointly finance the payment of gratuity, pension or allowance to pensionable officers at their retirement. The split of pension costs is determined based on the accumulated pensionable emoluments earned by the pensionable employee while in government services as compared with the employee’s service with the Group up to retirement.

The valuation of the defined benefits obligations is determined using the projected unit credit method. The most recent full actuarial valuation of the defined benefits obligations was carried out as at 31 March 2016.

The assumptions which have the most significant effect on the results of the valuation are those relating to discount rate, future salary increase rate, post-retirement mortality and historical average annual salary increase rate. The assumptions used by the actuary are the best estimates chosen from a range of possible actuarial assumptions, which due to the timescale covered, may not necessary borne out in practice. The present value of the liabilities is derived from cash flows projections over long periods and is inherently uncertain.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY

NOTES TO FINANCIAL STATEMENTS
31 MARCH 2016

4 FINANCIAL INSTRUMENTS, FINANCIAL RISKS AND CAPITAL RISKS MANAGEMENT

(a) CATEGORIES OF FINANCIAL INSTRUMENTS

The following table sets out the financial instruments as at the end of the reporting period:

| | Group | | NParks | |
|--|-------------|-------------|-------------|-------------|
| | 2015/2016 | 2014/2015 | 2015/2016 | 2014/2015 |
| | \$ | \$ | \$ | \$ |
| Financial assets | | | | |
| Loans and receivables (including cash and cash equivalent) | 251,340,902 | 229,939,749 | 251,184,152 | 229,801,129 |
| Financial liabilities at amortised cost | 61,736,968 | 59,996,867 | 61,725,974 | 59,992,026 |

(b) FINANCIAL RISK MANAGEMENT POLICIES AND OBJECTIVES

The Group is exposed to financial risk arising from its operations which include interest rate risk, credit risk and liquidity risk. The Group has written policies and guidelines, which set out its general risk management framework as discussed below.

There has been no change to the Group’s exposure to these financial risks or the manner in which it manages and measures the risk.

(i) Interest rate risk management

The Group’s exposure to changes in interest rates relates primarily to fixed deposits and non-current trade receivables. Surplus funds in NParks are placed with Accountant-General’s Department (“AGD”) as disclosed in Note 6. Other than funds placed with AGD and non-current trade receivable with fixed interest rate as disclosed in Note 7, there are no other significant interest-bearing assets or interest-bearing liabilities as at the end of the reporting period.

Interest rate sensitivity analysis has not been presented as management does not expect any reasonable possible changes in interest rates to have a significant impact on the Group’s operations and cash flows.

(ii) Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group.

Credit risks, or the risk of counterparties defaulting, are controlled by the application of regular monitoring procedures.Except for receivables due from MND and other government agencies, there is no significant concentration of credit risk. The extent of the Group’s credit exposure is represented by the aggregate balance of financial assets at the end of each reporting period.

(iii) Liquidity risk management

Liquidity risk arises in the general funding of the Group’s operating activities. It includes the risks of not being able to fund operating activities in a timely manner. To manage liquidity risk, the Group places majority of its surplus funds with the Accountant-General’s Department which are readily available where required.

(iv) Fair values of financial assets and financial liabilities

The carrying amounts of financial assets and financial liabilities as reported in the financial statements approximate their respective fair values due to the relatively short-term maturity of these financial instruments.

(c) CAPITAL RISK MANAGEMENT POLICIES AND OBJECTIVES

The Group manages its capital to ensure that it will be able to continue as a going concern while fulfilling its objective as a statutory board.

The capital structure of the Group consists of accumulated surplus, capital account, sinking fund and share capital. The overall strategy of the Group remains unchanged from the previous financial year.

5 RELATED PARTY TRANSACTIONS

Some of the Group's transactions and arrangements are with related parties and the effect of these on the basis determined between the parties is reflected in these financial statements. The balances are unsecured, interest-free and repayable on demand unless otherwise stated.

The Group and NParks entered into the following significant transactions with its parent Ministry, MND, and other related parties during the year:

| | Group and NParks | |
|--|-------------------------|------------------|
| | 2015/2016 | 2014/2015 |
| | \$ | \$ |
| MND | | |
| Services and expenses paid | 1,694,040 | 906,100 |
| Revenue collected on behalf | 29,390,341 | 24,375,392 |
| Development expenditure paid on behalf | | |
| – Gardens by the Bay | 5,075,680 | 2,962,542 |
| – Other state projects | 85,363,804 | 50,215,174 |
| Grants received/receivable | | |
| – Operating grant | 224,454,238 | 216,205,716 |
| – Development grant | 97,577,955 | 44,717,220 |
| – Other grant | 1,782,701 | 486,736 |
| Other Ministries and Statutory Boards | | |
| Services and expenses paid to other statutory boards | 5,247,289 | 8,547,039 |
| Transfer of IT computer equipment from other statutory board | – | 672,634 |
| Expenses paid on behalf of other statutory boards | 14,403,268 | 12,999,682 |
| Computer and IT related expenses | 1,729,783 | 3,328,251 |
| Minimum lease receipts under operating leases recognised as an income (Note 26) | 1,048,000 | 921,226 |
| Minimum lease payments under operating leases recognised as an expense (Note 26) | 1,246,905 | 1,221,871 |
| Grants received/receivable | 4,701,236 | 3,759,115 |
| Garden City Fund | | |
| Purchase of publications/souvenirs | 86,125 | 88,883 |
| Transfer of donated gallery from Garden City Fund | – | 1,000,000 |
| Expenses paid on behalf | 383,020 | 188,148 |
| Gardens by the Bay | | |
| Services and expenses paid | 1,090,940 | 2,235,340 |
| Expenses paid on behalf | 264,762 | 1,603,252 |

Compensation of key management personnel

The remuneration of key management personnel during the financial year were as follows:

| | Group and NParks | |
|------------------------------|-------------------------|------------------|
| | 2015/2016 | 2014/2015 |
| | \$ | \$ |
| Short-term employee benefits | 1,738,220 | 1,646,011 |

NATIONAL PARKS BOARD AND ITS SUBSIDIARY

NOTES TO FINANCIAL STATEMENTS

6 CASH AND CASH EQUIVALENTS

| | Group | | NParks | |
|----------------------------------|------------------|------------------|------------------|------------------|
| | 2015/2016 | 2014/2015 | 2015/2016 | 2014/2015 |
| | \$ | \$ | \$ | \$ |
| Cash at bank | 145,271 | 215,846 | 3,467 | 77,578 |
| Deposits with AGD ⁽ⁱ⁾ | 224,837,979 | 208,231,459 | 224,837,979 | 208,231,459 |
| | 224,983,250 | 208,447,305 | 224,841,446 | 208,309,037 |

⁽ⁱ⁾ With effect from financial year 2009/2010, Statutory Boards were to participate in the Centralised Liquidity Management by the Accountant General's Department ("AGD") under AGD Circular 4/2009. Deposits are centrally managed by AGD, available to the statutory board upon request and earns interest at the average rate of 1.26% (2014/2015 : 0.85%) per annum.

7 TRADE RECEIVABLES

| | Group | | NParks | |
|--|------------------|------------------|------------------|------------------|
| | 2015/2016 | 2014/2015 | 2015/2016 | 2014/2015 |
| | \$ | \$ | \$ | \$ |
| Not past due and not impaired | 5,198,218 | 3,593,572 | 5,153,411 | 3,593,470 |
| Past due but not impaired ⁽ⁱ⁾ : | 1,802,326 | 1,797,215 | 1,802,326 | 1,797,215 |
| < 1 months | 441,528 | 175,369 | 441,528 | 175,369 |
| 1 months to 4 months | 16,798 | 72,707 | 16,798 | 72,707 |
| > 4 months | 1,344,000 | 1,549,139 | 1,344,000 | 1,549,139 |
| Impaired receivables | 1,840,000 | 2,071,494 | 1,840,000 | 2,071,494 |
| Less: Allowance for impairment | (1,840,000) | (2,071,494) | (1,840,000) | (2,071,494) |
| Total | 7,000,544 | 5,390,787 | 6,955,737 | 5,390,685 |
| Represented by: | | | | |
| Current portion | 5,656,544 | 3,878,787 | 5,611,737 | 3,878,685 |
| Non-current portion | 1,344,000 | 1,512,000 | 1,344,000 | 1,512,000 |
| Total | 7,000,544 | 5,390,787 | 6,955,737 | 5,390,685 |

The credit period on rendering of services is 30 days (2014/2015 : 30 days). Other than non-current receivables which interest is charged at 2%, no interest is charged on the trade receivables and no collateral is held by the Group over the trade receivables.

⁽ⁱ⁾ No allowance has been made on these receivables as management believes that there has not been significant change in credit quality and the amounts are still considered recoverable.

Majority of the Group's receivables that are neither past due nor impaired are creditworthy counterparties with good track record of credit history. Except for the non-current trade receivables, there are no customers who represent more than 5% of the total balance of trade receivables.

In determining the recoverability of a receivable the Group considers any change in the credit quality of the receivable from the date credit was initially granted up to the reporting date. Credit risk is limited due to management's on-going evaluation of the creditworthiness of the Group's customers and that majority of the Group's trade receivables are within their expected cash collection cycle.

Movement in the allowance for doubtful debts

13 PROVISION FOR PENSION COSTS

| | Group and NParks | |
|---|------------------|-----------|
| | 2015/2016 | 2014/2015 |
| | \$ | \$ |
| At beginning of the year | 5,578,074 | 5,994,979 |
| Provision for the year | 151,902 | 165,307 |
| Payments during the year | (95,000) | (582,212) |
| Remeasurement on defined benefit obligation: | | |
| Actuarial gain arising from changes in financial assumptions | (339,094) | – |
| Actuarial gain arising from changes in experience adjustments | (1,510) | – |
| At end of the year | 5,294,372 | 5,578,074 |
| Represented by: | | |
| Current portion | 2,025,697 | 90,000 |
| Non-current portion | 3,268,675 | 5,488,074 |
| | 5,294,372 | 5,578,074 |

Amounts recognised in income or expenditure in respect of the defined benefit plan are as follows:

| | Group and NParks | |
|---------------|------------------|-----------|
| | 2015/2016 | 2014/2015 |
| | \$ | \$ |
| Interest cost | 45,099 | 47,500 |
| Service cost | 106,803 | 117,807 |
| Total | 151,902 | 165,307 |

The provision has been estimated by management based on the most recent valuation of the pension scheme performed by an independent firm of professional actuaries.

The principal assumptions used by the professional actuaries in determining the pension costs were as follows:

| | 2015/2016 | 2014/2015 |
|----------------------|-----------|-----------|
| Discount rate | 2.2% | 0.8% |
| Salary increase rate | 3.0% | 3.0% |

Assumptions regarding future mortality are based on published statistics and mortality tables.

NATIONAL PARKS BOARD AND ITS SUBSIDIARY

NOTES TO FINANCIAL STATEMENTS
31 MARCH 2016

14 DEFERRED REVENUE

| | Group and NParks | |
|-----------------------------------|------------------|-----------|
| | 2015/2016 | 2014/2015 |
| | \$ | \$ |
| Lease premium received in advance | 1,381,945 | 1,465,278 |
| Deferred rental income | 3,024,000 | 3,192,000 |
| Plan fees received in advance | 1,062,000 | 1,001,300 |
| Other income received in advance | 436,025 | 169,911 |
| | 5,903,970 | 5,828,489 |
| Represented by: | | |
| Current portion | 2,951,458 | 2,348,744 |
| Non-current portion | 2,952,512 | 3,479,745 |
| | 5,903,970 | 5,828,489 |

The lease premium received in advance represents the unamortised balances of lease premium received in advance from a tenant.

15 CONTRIBUTION TO CONSOLIDATED FUND

With effect from 1 April 2003, NParks is required to make contribution to the Government Consolidated Fund in accordance with the Statutory Corporations (Contributions to Consolidated Fund) Act, Chapter 319A. The provision is based on the guidelines specified by the Ministry of Finance. It is computed based on the net surplus of NParks for each of the financial year at the prevailing corporate tax rate for the Year of Assessment. Contribution to consolidated fund is provided for on an accrual basis.

16 DEFERRED CAPITAL GRANTS

| | Group and NParks | |
|---|------------------|--------------|
| | 2015/2016 | 2014/2015 |
| | \$ | \$ |
| Balance at the beginning of the financial year | 116,309,524 | 117,253,342 |
| Amounts transferred from Government grants (Note 11) | 8,850,953 | 8,601,443 |
| Amounts transferred from Garden City Fund (Note 20) | – | 1,000,000 |
| | 125,160,477 | 126,854,785 |
| Less: Amortisation of Deferred Capital Grants | (11,125,439) | (10,545,261) |
| Balance at the end of the financial year | 114,035,038 | 116,309,524 |
| Total capital grants received (excluding grants-in-kind transferred from Garden City Fund) and utilised since establishment | 240,074,383 | 231,223,430 |

17 CAPITAL ACCOUNT

Capital account represents the value of assets net of liabilities (excluding the leasehold land acquired via Government capital grants) transferred from the former Parks and Recreation Department (“PRD”) of MND when NParks was established in June 1990 and when PRD merged with NParks in July 1996.

| Issued and fully paid up: | | | | |
| At the beginning of the year | 1,000 | 1,000 | 1,000 | 1,000 |
| Equity injection ⁽ⁱ⁾ | 190,000 | – | 190,000 | – |
| At the end of the year | 191,000 | 1,000 | 191,000 | 1,000 |

⁽ⁱ⁾ Injection of capital is part of the Capital Management Framework for Statutory Boards under Finance Circular Minute M26/2008. The shares have been fully paid and are held by the Minister for Finance, a body corporate incorporated by the Minister for Finance (Incorporation) Act (Chapter 183). The holder of these shares, which has no par value, is entitled to receive dividends.

19 SINKING FUND

The sinking fund is designated to fund the replacement and capital improvement of property, plant and equipment.

20 NET ASSETS OF GARDEN CITY FUND

NParks established the Garden City Fund (“GCF”) on 1 July 2002 to enhance the enjoyment of the garden city in areas where there is no government funding. The Garden City Fund is managed, administered and controlled by the Garden City Fund Management Committee (the Committee), although NParks has the authority to remove any members from the Committee, and provide directions and guidelines on the conduct of meetings and other matters relating to the proceedings of the Committee.

The Garden City Fund comprises the Garden City Endowment Fund (GCEF) and the Garden City Non-Endowment Fund (GCNEF). The GCNEF comprises all moneys transferred from the specific funds of NParks upon the formation of the Garden City Fund on 1 July 2002 and all other contributions to the GCNEF.

The GCNEF and the income from the GCEF will be used to further the objectives of the Garden City Fund.

Upon dissolution of the Garden City Fund, the remaining moneys in the fund shall be donated to charitable organisations which have been designated as Institutions of a Public Character under the Income Tax Act (Chapter 134) and registered under the Charities Act (Chapter 37).

The following financial information represents GCNEF. There has been no contribution to the GCEF since establishment.
