About Community In Bloom Programme
Community In Bloom (CIB) is a programme launched by National Parks Board (NParks) in 2005. It aims to nurture a gardening culture among Singaporeans by encouraging and facilitating community gardening efforts. It is also an opportunity to build community bonds and strengthen social resilience.

Over the years, the Community in Bloom (CIB) programme has worked with Town Councils, Residents' Committees (RC) and Neighbourhood Committees (NC) to set up community gardens where residents can enjoy gardening, as well as bond with their neighbours.

Community gardeners in the Bukit Gombak Division and Hong Kah North SMC benefit from having their gardens located near to the Tengah Nature Way. The rich biodiversity found in the Nature Way increases pollination of fruiting and flowering plants as well as acts as biological control for pests. Community gardens with biodiversity-attracting plants draw more species of birds, butterflies and small mammals.

South West Community Development Council (CDC) is home to over 250 community gardens located across housing estates, schools and organizations. The CDC supports community gardening through its 1,000,000 Native Plants @ South West seed funding programme that helps to set up new gardens in the district.

Bukit Gombak – Hong Kah North Community Garden Trail

A Between Blk 348 and 349 Bukit Batok Street 34 Hong Kah North Zone 5&6 RC

The garden is an interesting mix of vegetables and butterfly attracting flowering ornamentals. Its fruiting vegetables are especially productive, in no small part owed to the pollinators attracted. One can expect to healthy looking varieties of bitter gourds and legumes growing in the garden.

B Blk 390 Bukit Batok West Ave 5 Bukit Gombak Goodview Garden RC

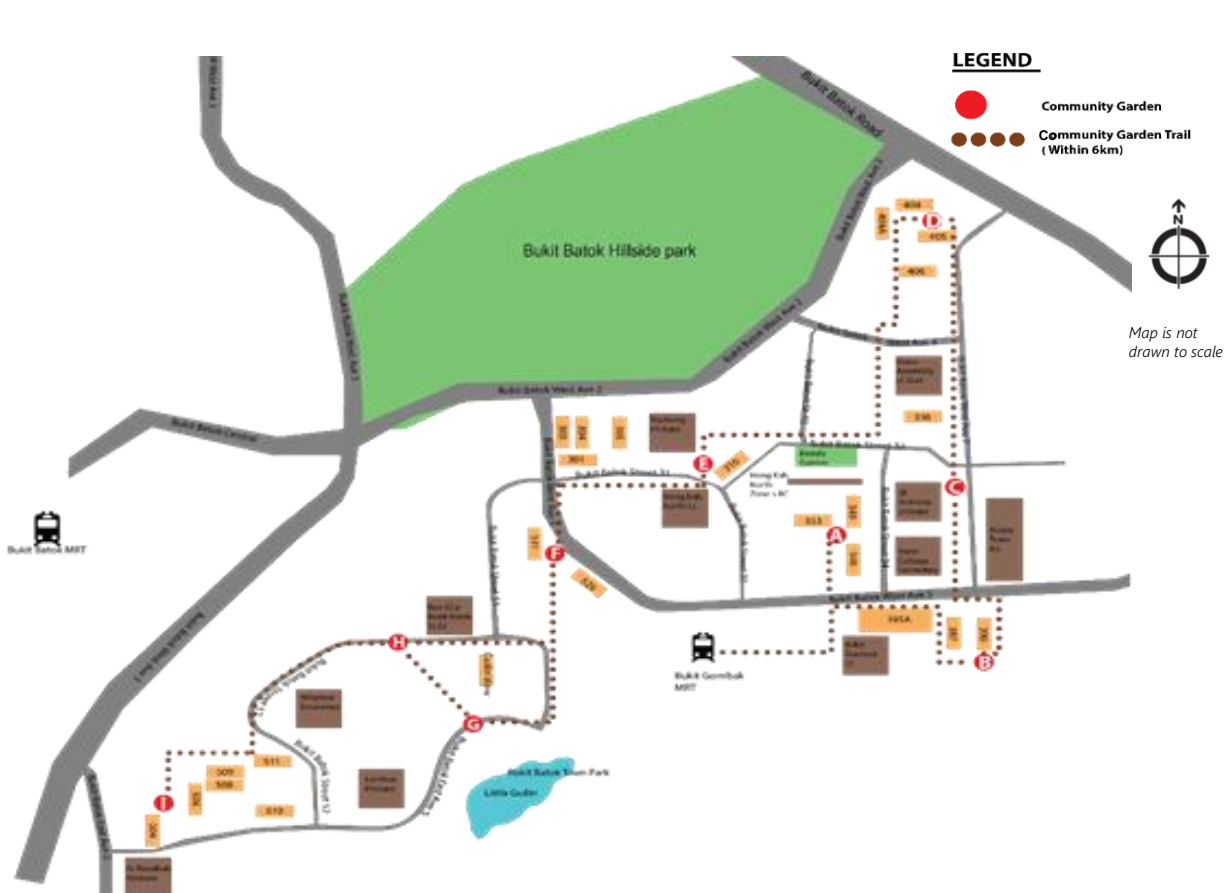

Gardeners of this large green space practice mixed planting with edibles and biodiversity-attracting plants such as passion fruits, tomatoes and different types of leafy greens. This results in a regular bountiful harvest that is shared among the community.

C Blk 336 Bukit Batok Street 32 Hong Kah North Zone 4 RC

Teachers and students from St. Anthony's Primary School work with residents to cultivate the plots. They are often visited by native birds such as the Yellow-vented Bulbul and Olive-backed Sunbird while tending to their long beans and leafy greens.

D Blk 405 Bukit Batok West Ave 7 Hong Kah North Zone 1 RC

Tucked away in a corner of the estate is this soothing patch of greenery next to the Bukit Batok Hillside Park. Gardeners often enjoy the songs of the native birds around as they harvest the bananas and jambu found in the garden.

E Blk 310 Bukit Batok Street 31 Hong Kah North Zone 3 RC

This community garden welcomes its visitors with a tastefully planted front dominated by ornamentals such as Dwarf Mexican Petunia (*Ruellia simplex*). Upon entering it, one is surprised by the sight of an enclave filled with leafy and fruiting vegetables.

F Blk 531 Bukit Batok Street 51 Bukit Gombak Sunshine RC

You will find both an allotment edible garden and a bonsai garden here. Passion fruit grows among green leafy vegetables while pots of colourful flowering plants play hosts to pollinators like Plain Tiger and Common Grass Yellow.

I Blk 506 Bukit Batok Street 52 Bukit Gombak Hillgrove RC

This is a peaceful garden set within a buzzing neighbourhood. Meet residents who enjoy gathering here to catch up on the latest news amidst the Yellow Cosmos (*Cosmos sulphureus*) and Red Button Ginger (*Costus woodsonii*).

H Blk 535 Bukit Batok Street 52 Bukit Gombak Guilin RC / PCF Sparkletots @ BG535

Preschool students love visiting this garden to learn about our native flora and fauna. The garden attracts a variety of butterflies and birds thanks to its mix of well-selected nectar and host plants such as Ranong (*Asystasia nemorum*) and Giant Milkweed (*Calotropis gigantea*).

G Along Bukit Batok Street 52 Tengah Nature Way

Tengah Nature Way links Bukit Timah and Central Catchment Nature Reserves with the Western Catchment with more than 80 species of trees and shrubs. It is a nature trail, where hikers can learn more about our native flora and fauna, while enjoying the greenery and fresh air.
