

Sembawang Hot Spring Park – Public Engagement

In 2017, NParks carried out a public engagement exercise to invite the public to share their thoughts on the plans for the upcoming Sembawang Hot Spring Park.

Between 25 November and 10 December 2017, more than 6,000 suggestions and feedback were received. These will be used to refine the plans before commencement of works. The results are summarised below.

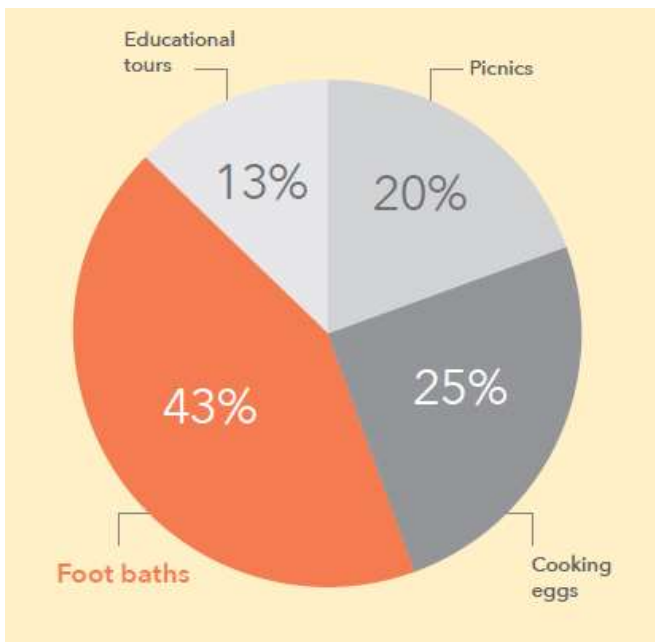

Landscape & Greenery

The feedback received showed that majority of the public would like to have naturalised streams as a landscape feature within the park. They also felt that shaded trails are an important provision to ensure a comfortable experience.

Activities

The public in general are keen to experience foot-bathing and egg-cooking in the park, continuing from the current activities carried out at the hot spring.

Amenities

Most people preferred amenities that would provide a more comfortable experience at the park, such as washrooms and sheltered seating areas.
